NAVIGATING THE FUTURE OF FINTECH:

INTELLECT'S eMACH.ai REDEFINES AI-LED BANKING TECHNOLOGY FOR GLOBAL INNOVATION

Q&A

Tell us briefly about Intellect Design Arena Limited.

Intellect is an Enterprise Financial Technology Company offering Products for the nextGen transformation of Banks, Insurance and Capital Market customers. Intellect helps global Tier 1 to Tier 3 banks in their Core Banking, Lending, Wealth, Transaction Banking, Trade and Supply Chain transformation. It has built the largest composable and contextual Open Finance platform - eMACH.ai. Our Technology powers 7 out top 10 European banks, 5 of Top 10 US Banks, 8 of Top 10 Middle East Banks, 7 of Top 10 Indian Banks and 5 of Top 10 Asian Banks. In India we partner with RBI, NABARD, LIC, AMFI and leading PSU and Private Banks. We have 275+ Global customers in over 50+ countries with an annual revenue run rate of Rs. 2,500 Cr. We have a 5,000+ strong team of Technologists, Banking Experts and Customer-facing roles.

How do you see India's position as a global Fintech solution provider?

India is at the forefront of Digital/AI technology and entrepreneurial spirit. Currently, the Fintech Ecosystem is targeting the large Indian market. We have the technology for the world. It requires the next level of investments and perseverance to design last 2% for global needs and expectations. Our fintech systems will need to understand the complex and very mature financial systems of Europe and America requiring a huge investment appetite.

What are the Products and Solutions Intellect Design Arena offers to the Fintech Industry?

Intellect's "first principle" technology suite, eMACH.ai, is an AI-led comprehensive open finance platform offering composable solutions for banks and financial institutions to curate and contextualise products to address specific customer's needs, across verticals like Retail, Corporate, Wealth. These include platforms for Retail Banking, Core Banking, Lending for Retail, SME and Corporate segments, Credit Cards, Core Banking for Central Banks, Digital Engagement, Wealth Management, Liquidity, Virtual Accounts and Cash Management, Payments, Digital Transaction Banking encompassing Payments, Receivables and Collection, Trade and Supply Chain Finance, AI-led Data platform and Underwriters Exchange for Insurance

Digital platforms are replacing traditional products, necessitating understanding clients' adoption and potential across your client base. Please share the opportunities and challenges you observe in this space.

Financial institutions are mostly organised around customer segments vis Consumer Banking, Corporate Banking, Wealth Management, and Insurance. The Technology products are also aligned so and therefore boxed to that extent. Certain bolt-on solutions address only specific needs, adding to the complexity. eMACH.ai has a superior architecture with Events, Microservices, APIs giving the flexibility of deployment on Cloud, allowing banks to create or extend their UI/UX through Headless APIs and with embedded AI for transforming the bank from digital to cognitive enterprise. With its ability to co-exist with traditional technologies, eMACH.ai provides extensibility for the banks to adopt the new wave of AI as per their priorities

How do your products help transform asset management firms into profitable ones?

Asset management companies have a pivotal role in wealth creation. The need is for enhanced customer centricity, flexible portfolio constructs and speed of decision and execution. Intellect's eMACH.ai platform enables AMCs to adopt AI-embedded technology assisting at each stage from due diligence to portfolio rebalancing thereby increasing their profitability and mitigating their risks. This technology is live with leading Wealth Management entities in India.

There are prominent domestic and International players providing Fintech solutions, what sets you apart from your competition?

Intellect Research has one of the largest global teams with over 1000 smart engineers working for over 10 years. We had invested over Rs. 2250 crores in R&D and continue to invest close to Rs. 275 crores annually at Indian cost. These investments translate to over $200m at Silicon Valley cost structure. Research with First principle thinking based on Design Thinking practices is driving the first fully composable and contextual platform with 329 Microservices, 500 events, 1757 APIs.

Is your company planning to introduce any new products in 2024?

In 2024, we will launch Purple Fabric, a Comprehensive AI suite with the ability to address Bank's Data security and Explainability for making decisions with traceability. It took 8 years to build this platform consisting of 9 technologies with 4 technologies for organising document-based unstructured data to decision-grade data and 5 technologies for integrating structured & unstructured data with banks' policies and roles to drive recommendations or nudges for action.

Purple Fabric is also an integral part of several of our platforms like Digital Commerce, Trade and Supply Chain, Autonomous Underwriting Loan Origination (Kiri), Financial Advisor Suite (Wealthforce), Accounts Payable Exchange (APX), Corporate Procurement Exchange (CPX), Government Procurement Exchange (GPX), to drive higher operational effectiveness.
