▼ SUNRISE IN EAST: THE INDIAN

"If India has to achieve [its solar] targets, we have to look for scale and speed. The whole value chain has to be looked bottom-up. Else we will continue to be dependent on foreign countries for our [equipment] requirements"

AMIT SINGH
CEO, Adani Green Energy

"There are two crucial areas. Firstly, how do we make renewables more reliable and make an ecosystem.... Secondly, how to make discoms buy this power?"

PRAVEER SINHA, *CEO & MD, Tata Power*

"Last year, we struggled adding 15 GW [of solar power capacity] because of issues related to land, transmission, storage etc. All these scenarios must be discussed now"

SUMANT SINHA, *Chairman, ReNew*

▼ DISCOVERY IN INDIA: THE QUEST FOR OIL AND NATURAL GAS

"We have to look for ideas to monetise the smaller and mid-size discoveries. Big discoveries may not happen often. We have to recalibrate our strategies"

SANJAY BARMAN ROY
President, Exploration & Production Business, Reliance Industries

"India has transformed the auction system; new regulations for exploration were put in place. Now, focus should be on enabling the explorer with further ease of doing business"

DEB ADHIKARI, *Director, FIPI*

"White Hydrogen will soon capture the people's imagination. It's naturally occurring hydrogen and there is no end to it. Today, there is limited tech to locate and capture it"

RABI BISTIA, *Geoscientist*
