▼ WIND ENERGY: OVERCOMING THE HEADWINDS

"The beauty of India is that if you put solar curve, wind curve on top of each other and plug in the amount of storage, it can compete with thermal easily"

GIRISH TANTI
Vice Chairman, Suzlon Energy

"To accelerate wind addition...stop building new thermal plants, replicate what was done for solar parks, and bring in friendlier policy to repower existing wind farms"

AJAY SHANKAR
Distinguished Fellow, TERI

"India by far is the most friendly country for renewable energy players. Still, there are some issues, related to other government [ministries] that need to be realigned"

A. NITHYANAND
CEO, Renewables Business, India, Sembcorp

"There is need to unbundle carriage and content to realise the true potential of the country's wind energy. The availability of land is a big issue"

BALA V. KUTTI
Promoter, Indowind Energy

▼ POWER: STRENGTHENING THE DISCOMS

"Gujarat has a unique structure...a holding company that deals with power procurement and policy issues, so discoms are focused on supplying power, billing and collections"

YOGESH CHAUDHARY
MD, Dakshin Gujarat Vij Company Ltd

"Energy transition is threatening discoms. We have to make them ready to handle the change, both from the grid stability as well as sustainability point of view"

ASHISH GOEL
Chairman, UP Power Corporation Ltd

"For years, discoms remained the weakest link in India's power sector story. The AT&C losses in some states are as high as 60 per cent whereas some states have done exceptionally well"

RAJIB K. MISHRA
Former CMD, PTC India Ltd
