

"We are at 100-200 MW of storage. The NITI Aayog's report states that we should have around 200 GW capacity by 2030 to ensure grid stability"

SAMBITOSH MOHAPATRA
Partner Leader, ESG, Climate & Energy, PwC India

THE PATH TO CLEANER ENERGY

"Gujarat targets to have 100 GW installed capacity of renewables by 2030. For penetration of this energy, we will require large storage capacities"

JAI PRAKASH SHIVAHARE
Managing Director, Gujarat Urja Vikas Nigam Ltd

"Along with Li-ion batteries, we are working to build graphene supercapacitor-based batteries to provide round-the-clock storage for commercial vehicles"

DEEPAK PANDEY
CEO, Invergy India Private Limited

"Globally, there is a movement towards adding LNG vehicles. Indraprastha Gas Limited in the long term will add 100 LNG dispensers; this year 5-6 stations"

KAMAL KISHORE CHATIWAL, *MD, Indraprastha Gas Ltd*

"Telangana provides free electricity to farmers. Now, we are encouraging them to instal solar pumps via the PM-KUSUM scheme"

KARNATI VARUN REDDY, *CMD, Northern Power Distribution Company of Telangana Limited*

FUTURE OF LIGNITE IN INDIA'S ENERGY BASKET

"Lignite is not a younger brother of coal. It's an important mineral...here for the next few decades. Globally, major players in Europe are ramping up production. So are China and Indonesia"

ROOPWANT SINGH
Managing Director & Executive Director, Gujarat Mineral Development Corporation

BUILDING SKILL BRIGADE FOR RENEWABLE ARENA

"There is a serious dearth of adoption of silicon technology. We may have policy in place, business in place, but the big question is, who will make the solar panels, cells and ingots?"

S. SUNDAR MANOHARAN
Director General, Pandit Deendayal Energy University
