CULTURAL SPLENDOR MEETS MODERN COMFORT

To facilitate the transportation of devotees to Prayagraj, the railways will operate 1 3,000 trains, including special trains. For local transport within Prayagraj, an online e-rickshaw and e-auto booking facility will be introduced to ensure a seamless travel experience.

Drivers of local e-vehicles are being trained to provide courteous service to visitors. To assist devotees unfamiliar with Hindi or English, drivers are also being equipped with Google Voice Assistant training. These e-vehicles will be readily available at railway stations, bus stands, airports, and hotels. Additionally, a dedicated pink service with female drivers will be introduced, offering a safe and convenient option for women travelers.

Devotees at Mahakumbh will also have the opportunity to enjoy state-of-the-art, eco-friendly cruise services. Several cruises, including the electric-powered 'Nishadraj,' will be available, each capable of safely accommodating over 100 passengers. With top-tier arrangements for food and beverages and LED screens onboard, these cruises promise a unique and memorable experience for all passengers.

Mahakumbh 2025 will feature three grand cultural platforms in the Mela area, offering devotees and tourists at the Sangam a chance to witness India's rich traditions, diverse arts, and cultural genres. These platforms will each have a seating capacity of over 1,000 spectators. Additionally, the Ganga Pandal, with a capacity to host 10,000 spectators, is being constructed to serve as a centerpiece for cultural events. Beyond the sacred bathing festivals, the entire Mahakumbh will host an array of performances showcasing various artistic genres, ensuring an enriching and immersive experience for all attendees.

Special arrangements have been made to provide the sacred water of Triveni to devotees visiting Mahakumbh. Bottled and urn-packaged water from Triveni will be available at all bus stands and railway stations across the city, with self-help group women managing this responsibility.

Robust arrangements are being made to ensure an uninterrupted water supply throughout the entire fair area. Jal Nigam (Urban) will manage the supply through an extensive network of 1,249 kilometers of pipelines and 56,000 connections, ensuring that devotees, sanyasis, and Kalpvasis face no inconvenience during their spiritual journey.

Uttar Pradesh Power Corporation Limited is installing designer streetlight poles across the fair area. These unique poles, adorned with lights dedicated to Lord Shankar, Ganesha, and Vishnu, will line every major road leading to Sangam. Their divine design and illumination will offer devotees an experience of spiritual serenity and aesthetic grandeur.
