

DIVYA-BHAVYA-DIGITAL MAHAKUMBH

The grand and divine Kumbh of 2019 held in Prayagraj was witnessed by the entire world. Building upon this success, Chief Minister Yogi Adityanath, under the guidance of Prime Minister Narendra Modi, has taken another significant step for Mahakumbh 2025 by digitalizing this monumental event. For the first time, the world will experience the Mahakumbh in a digital and technology-driven format.

In line to enhance the event's grandeur and promote it globally, the state government is prioritizing the digitization of the entire fair. AI technology, apps, chatbots, and Google navigation will be used extensively during Mahakumbh 2025. Devotees and visitors will have access to essential information about the fair, such as details of ghats, akhadas, puja rituals, and discourses, all available online.

The Prayagraj Mela Authority will also enable live monitoring of facilities, including Ganga Aarti and other services provided during the fair. The primary objective behind digitizing the Mahakumbh is to boost global visibility, enhance security, monitor every aspect of the event, and ensure that all facilities are provided to the right person at the right time.

Information on sermons by prominent saints, the locations of camps, and the various sections of the fair will be easily accessible online. In addition, updates on new features like laser shows and water sports will be available to visitors. This Mahakumbh, a showcase of India's digital power, will provide real-time information through a website and mobile app.

For the first time, a chatbot named "Kumbh Sahayak" will provide information in over 10 languages. Security measures will be enhanced with AI-powered cameras, and Google navigation will assist in guiding visitors through the temporary city set up for Mahakumbh. This event will not only highlight India's rich cultural heritage but also demonstrate the country's advancements in digital technology.

THE POWER OF INNOVATION

In alignment with Chief Minister Yogi Adityanath's vision of blending heritage with development, the Mela Authority is transforming Mahakumbh 2025 into a 'Digital Mahakumbh'. A key highlight of this initiative is the creation of the 'Digital Mahakumbh Experience Center', designed to bring the mythological traditions and stories of Mahakumbh to life for the new generation through cutting-edge digital and virtual reality technologies.

The Digital Mahakumbh Experience Center will use virtual reality, holograms, and digital projection to narrate the mythological tales of Mahakumbh, Triveni Sangam, and the significance of Prayagraj. The center will feature eight galleries, including the 'Immersive Walk-Way,' where visitors can virtually experience the epic event of 'Samudra Manthan.' This gallery, combining tradition with modern innovation, offers an unparalleled opportunity to relive the stories of ancient mythology.

Another gallery, the 'Mystic Walk-Way,' will immerse visitors in the spiritual aura of the Mahakumbh, while virtual reality and LED tunnels will showcase the rich history and heritage of Kumbh, Prayagraj, and Triveni Sangam. The essence of Mahakumbh will be brought to life through holograms and digital projections, offering a blend of tradition and technological marvel.

To commemorate their experience, visitors can explore a dedicated 'souvenir store,' featuring unique keepsakes from the Mahakumbh to take home. Additionally, to ensure a safe and stress-free experience for everyone, the Mela Authority has implemented a 'unidirectional visitor flow' system alongside a 'real-time monitoring system' for effective crowd management.
