The 'Digital Mahakumbh Experience Center' not only preserves the legacy of Mahakumbh but also redefines it as a symbol of innovation and cultural pride for the global audience.

360-DEGREE VIEW EXPERIENCE

For the first time, Mahakumbh Mela 2025 will offer devotees and tourists a unique and immersive experience with a 360-degree view of the event's key locations, accessible directly on their mobile devices. In collaboration with Google, the Prayagraj Development Authority has introduced this cutting-edge feature to make the world's largest spiritual gathering more accessible and engaging.

Through this initiative, major landmarks of the Mahakumbh Mela, including temples, bathing ghats, pontoon bridges, and more, can be tracked and navigated using Google Maps. Additionally, the 'Street View' feature has been integrated, allowing users to view these locations in a 360-degree perspective, providing a virtual on-the-ground experience from anywhere in the world.

This is the first instance where navigation and advanced features like 'Street View' are being applied to a temporary city, setting a new standard for digital innovation. The service will be available even before the Mahakumbh begins, enabling people across the globe to virtually explore the event and feel the excitement of Mahakumbh Mela from their devices.

Whether sitting at home in India or abroad, devotees and tourists will be able to witness the grandeur and divinity of the Mahakumbh Mela like never before, enhancing the global reach and appeal of this cultural phenomenon.
