promoted. Stalls offering these eco-friendly alternatives will be set up within the fairgrounds to encourage their use. To ensure the success of the Plastic-Free Mahakumbh campaign, the fair area will be divided into different zones, with a nodal officer appointed for each zone. These officers will work diligently under a structured action plan to maintain cleanliness and ensure their respective zones remain plastic-free.

GREEN MAHAKUMBH: A VISION FOR ENVIRONMENTAL SUSTAINABILITY

In line with the vision of a sustainable Mahakumbh, efforts are being made to transform the event into a 'Green Mahakumbh.' The focus is on making the Mahakumbh area polythene-free, while extensive green belts are being developed in and around Prayagraj. As part of the campaign, 2.71 lakh plants are being planted, with 50,000 saplings being specifically planted along the 18 roads leading into the city. Species like Kadamba, Neem, and Amaltas are being chosen for plantation along the roads, creating green corridors that enhance the environmental aesthetics of the area. The responsibility for developing these green belts within the city lies with the Municipal Corporation Prayagraj and the Prayagraj Development Authority. In alignment with India's ancient culture of nature conservation, the government is promoting the message of environmental harmony, which ties together elements such as trees, rivers, mountains, and celestial bodies with spiritual symbols.

As part of this environmental initiative, the Yogi government will also host a 'Bird Festival' in first week of February 2025, as part of Mahakumbh celebrations. The theme of the festival, "Kumbh's Faith, Nature Conservation, and Climate," reflects the deep-rooted connection between spirituality and nature conservation. The two-day conclave will feature discussions with national and international experts, alongside a series of panel discussions that will also include insights from saints, further promoting the conservation of nature during the Mahakumbh.

A COMMITMENT TO CLEANLINESS

Mahakumbh 2025

1,50,000 Temporary Toilets | **25 K+ Dustbins** | **10 K Cleaning Workers**

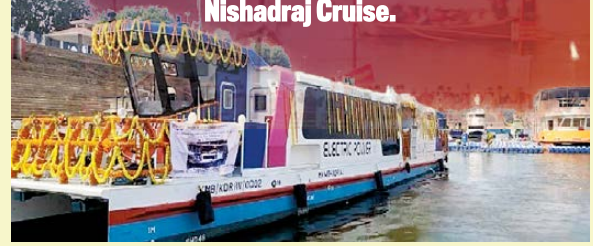

NISHADRAJ CRUISE

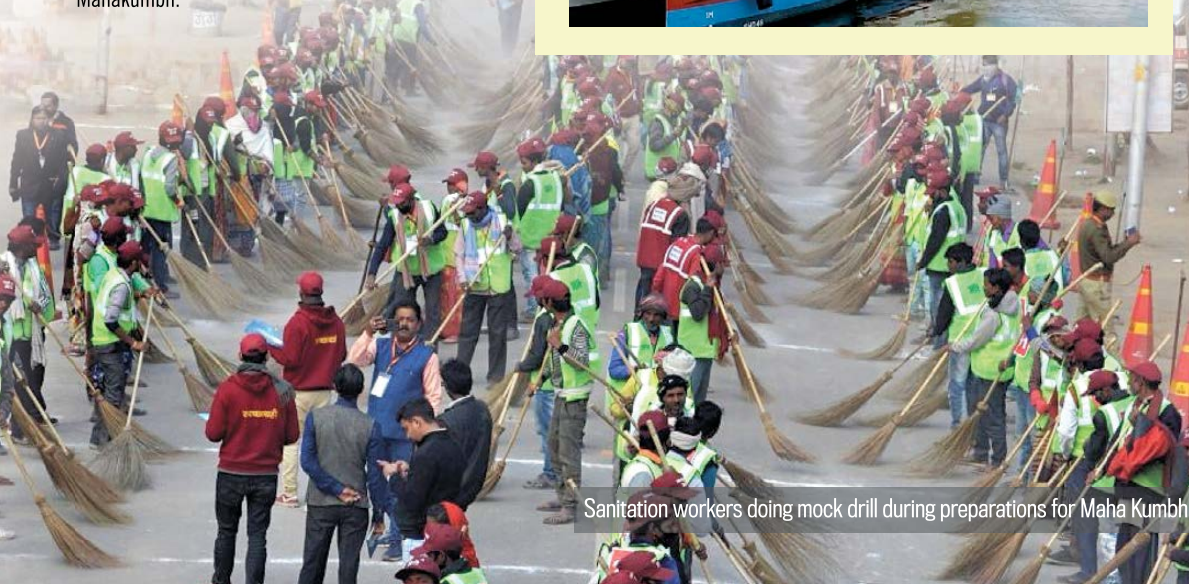

WILL PROMOTE THE MESSAGE OF ENVIRONMENTAL PROTECTION.

The cruise will be powered by batteries, ensuring a sustainable mode of transportation.

A temporary charging station will be set up in the Sangam area to power the cruise.

Devotees will enjoy a unique experience of the Sangam Yatra, with the eco-friendly Nishadraj Cruise.
