GUJARAT'S GREEN REVOLUTION
MORE CROP PER DROP

Rabi Krushimahotsav 2024 Dantiwada

In 2024-25, Gujarat is scripting a new chapter in agriculture, blending innovation, sustainability, and farmer welfare. The state is investing ₹80 crores to encourage the use of certified seeds for crops like groundnut, rice, and pulses, helping farmers boost productivity and income.

GROWTH IN AREA, PRODUCTION & YIELD OF AGRICULTURE CROPS OVER A PERIOD OF LAST 25 YEARS

To revolutionize soil health and cut fertilizer costs, Gujarat is embracing nano fertilizers under the PM PRANAM initiative. With ₹45 crores allocated, over 56 lakh nano urea bottles are set to reduce reliance on traditional fertilizers. Additionally, a ₹9.92 crore initiative promotes liquid organic fertilizers, ensuring richer soils and higher yields.

Technology is empowering farmers like never before. With ₹19.74 crores in smartphone subsidies and drones spraying fields across 25,000 acres, knowledge and efficiency are now at farmers' fingertips. The I-Khedut Portal, with over 14 lakh applications, ensures timely subsidies, while digital crop surveys are making data collection seamless.

Mechanization is also a key focus. A budget of ₹676 crores supports tractor purchases and tools, bringing efficiency in farm operation. The Kisan Parivahan Scheme now includes tractor trailers to further ease farm logistics.

Protecting crops from wildlife damage, Gujarat has earmarked ₹350 crores for fencing and ₹50 crores for solar-powered kits. These measures safeguard livelihoods while promoting eco-friendly solutions.

Finally, Gujarat supports farmers through thick and thin. During natural disasters, ₹603 crores have helped nearly 4.5 lakh farmers recover losses. The PM-Kisan Samman Nidhi continues to provide ₹6,000 annually to each farming family, offering a safety net for over 56 lakh households. With these initiatives, Gujarat's farmers are embracing a brighter, more resilient future — one seed, one innovation, and one harvest at a time.

NATURAL FARMING IN GUJARAT
A PATH TO SUSTAINABLE AGRICULTURE

Natural Farming (NF) is a chemical-free agricultural practice rooted in traditional Indian systems. It focuses on five core principles: Beejamrut, Jeevamrut/Ghan Jeevamrut, Vapsa, mulching, and mixed cropping. This sustainable approach enhances soil health, biodiversity, and climate resilience while minimizing dependency on external inputs. Gujarat has played a significant role in promoting and advancing natural farming practices. NF, aligning with global trends toward sustainable agriculture.

The Gujarat government has taken significant steps to promote natural farming. Key initiatives include establishing the Gujarat Prakrutik Krushi Vikas Board and the Gujarat Natural Farming Science University in Halol. Model farms, numbering 3,107, serve as practical demonstration sites, with plans to develop 3,245 more. Cluster-based training programs have trained over 55 lakh farmers to date. Additionally, the government has distributed 5 lakh books on NF and launched awareness campaigns using 1,200 GSRTC buses.

Financial support schemes play a vital role. The Desi Cow Maintenance Scheme provides annual assistance of ₹10,800, benefiting 1.76 lakh farmers. A subsidy of 10,000/hectare in first year and maximum upto 2 hectare can be given supports chemical-free farming in Dang district. Infrastructure aid for producing Jeevamrut/Ghan Jeevamrut supports 100 gaushalas and 500 farmer groups with a ₹4.20 crore budget.

Gujarat has been working in mission mode to promote natural farming practices across the state for improving soil fertility and reducing environmental degradation improving soil fertility and reducing environmental degradation. By embracing NF, Gujarat is fostering a sustainable, climate-resilient, and economically stable future for its farmers while ensuring safe and nutritious food for society. At present more than 7 Lakh acre cultivable area in Gujarat is under Natural Farming.
