GUJARAT'S AGRO-INDUSTRIAL TRANSFORMATION
EMPOWERING FARMERS THROUGH INNOVATION AND INFRASTRUCTURE

Gujarat, renowned for its agricultural diversity and resilience, stands as a key player in India's agro-industrial landscape. Along with the progressive agriculture, Gujarat also has a thriving agri and food processing sector. The states's skilled workforce, entrepreneurial spirit, and agiculture-friendly interventions have created a dynamic ecosystem that supports the growth of micro, small and medium enterprises(MSMEs)in the food processing sector. Gujarat is home to more than 39000 agri and food processing units including around 35000 micro and small units.

REGISTERED GIs IN AGRI IN GUJARAT	GI AREA
Bhaliya Wheat	Ahmedabad, Anand, Surendranagar and Bharuch
Gir Kesar Mango	Gir Somnath, Junagadh and Amreli
Kachchhi Kharek	Kutch

Gujarat has elevated the paradigm of agri and food processing sector with a notable share of 16.37 % in India's total agriculture & processed food products exports in the year 2022-2023 reflecting the states unwavering position in the national and global food supply chains.

THE GUJARAT AGRO INDUSTRIES CORPORATION LTD. (GAICL) : STRENGTHENING AGRO-INFRASTRUCTURE

The Gujarat Agro Industries Corporation Ltd. (GAICL) plays a pivotal role in fortifying the state's agro-industrial infrastructure. A notable example is the Gamma Radiation Processing Plant in Bavla, Ahmedabad, which began operations in 2014 and was upgraded in 2019 to meet USDA guidelines, enabling the export of mangoes and pomegranates to the USA. Additionally, the Centre for Perishable Cargo at SVPI Airport in Ahmedabad, operational since 2015, handles a daily capacity of 40 metric tons, preserving the quality of perishable goods in transit.

GAICL has also established essential cold storage and ripening facilities like the Banana Pack House in Jhagadia and the Dehydrated Onion Cold Storage at Mahuva.

INDEXT-A: FOSTERING INVESTMENT AND GROWTH

The Agri Business Extension Bureau (iNDEXT-a), established by the Government of Gujarat, acts as the catalyst for driving investment and growth in Gujarat's agro and food processing sectors. By bridging the gap between government bodies and private investors, iNDEXT-a strengthens the state's agro-business ecosystem.

iNDEXT-a's initiatives, including the development of agro-food parks, the modernization of agricultural value chains, and the promotion of agripreneurship, ensure the sector's competitiveness and sustainability, thus enhancing Gujarat's place on the world map of agro-business.

GUJARAT'S HORTICULTURAL SUCCESS
BLOOMING IN THE DESERT

In the arid and semi-arid regions of Gujarat, a quiet revolution is thriving. Thanks to innovative policies, resilient farmers, and cutting-edge technology, Gujarat now contributes 8% to India's fruit production, 7% to vegetables, and 10% to spices.

In 2023-24, over 22.57 lakh hectares were cultivated, yielding an impressive 269 lakh metric tons of horticultural produce. Fruits like mangoes, bananas, and papayas cover 4.49 lakh hectares, while vegetables such as potatoes, okra, and onions span 8.26 lakh hectares. The state leads the nation in growing papayas, sapotas, okra, and fennel.

In the dry landscapes of Kutch, Banaskantha, and Surendranagar, farmers have transformed barren lands into lush orchards. The famed Gir-Kesar mango enjoy GI tags, making them celebrated both domestically and internationally. Even the exotic Kamalam (dragon fruit) flourishes here, securing Gujarat the top spot in its production.

Vegetable farmers, too, are breaking boundaries, supplying raw materials to processing units for potato chips and dehydrated onions. Meanwhile, the state's spice producers—growing cumin, coriander, and fennel—are meeting global demand.

Supporting this boom are 531 cold storages with a capacity of 26.5 lakh tons, ensuring freshness and reducing waste.

Gujarat's horticulture journey is a testament to vision, hard work, and innovation, turning drylands into fields of prosperity.

AREA AND PRODUCTION OF OF HORTICULTURAL CROPS IN THE STATE IN THE YEAR -2023-24

Horticulture Crop	Area (Lakh Ha.)	Production (Lakh MT)	Major Crops
Fruit Crop	4.49	83.90	Mango, Banana, Papaya, Sapota, Pomegranate, Guava and Date Palm.
Vegetables	8.26	167.50	Potato, Onion, Tomato, Okra, Cauliflower, Cauliflower, Chili and Brinjal
Spices	9.60	15.70	Cumin, Coriander, Fennel, Garlic and Isabgol
Flower	0.22	2.01	Roses, lilies and Marigold
Total	**22.57**	**269.11**
