GUJARAT STATE SEED CORPORATION
A CATALYST FOR AGRICULTURAL GROWTH

INTRODUCTION
Gujarat State Seed Corporation Ltd. (GSSCL), established in April 1975 and known by its brand name "GURABINI," has been serving farmers for over five decades. GSSCL has earned farmers' trust through quality assurance, dedicated service, and a commitment to agricultural advancement. As a state-owned enterprise, it significantly contributes to agricultural research, seed production, and certified seed distribution.

INFRASTRUCTURE AND OPERATIONS
GSSCL's infrastructure includes processing plants, storage facilities, and a distribution network. Collaborating with research institutions and universities, the corporation stays updated on agricultural innovations. This ensures its operations remain responsive to farmers' evolving needs.

PRODUCTION OF QUALITY SEEDS
GURABINI seeds are cultivated under expert supervision in diverse agro-climatic regions. Each stage—from sowing to storage—is scientifically monitored to ensure genetic and physical purity, high germination rates, and vigor. GSSCL aims to produce 3 lakh quintals of seeds annually by 2024-25 and increase production to 3.5 lakh quintals by 2030. The focus remains on new, recommended seed varieties to improve the seed replacement ratio.

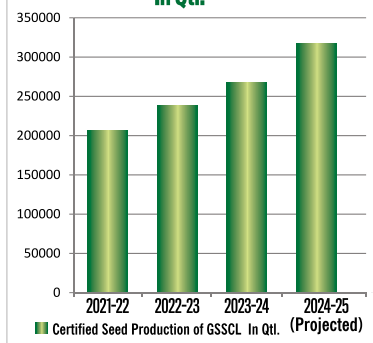

INNOVATION AND FUTURE PROSPECTS
GSSCL explores drought-tolerant and disease-resistant seed varieties to address climate change and pest resistance. This commitment to innovation ensures GSSCL's continued role in Gujarat's agricultural development.

CONCLUSION
GSSCL exemplifies a successful state-owned enterprise, enhancing Gujarat's agricultural productivity through quality seeds and research. Its dedication to innovation ensures it will remain a key driver of agricultural growth in the state.

GUJARAT ORGANIC PRODUCTS CERTIFICATION AGENCY
A TRAILBLAZER IN ORGANIC CERTIFICATION

The Gujarat Organic Products Certification Agency (GOPCA) stands as a trailblazer for the organic farming certification movement in Gujarat. Established in 2009, GOPCA plays a pivotal role in certifying organic agricultural products, ensuring compliance with national standards.

Initially covering 492 hectares, GOPCA's reach has expanded 40-fold to 21,528 hectares in 2023-24.With a mission to provide authentic certification for chemical and GMOs free farming practices in agriculture.

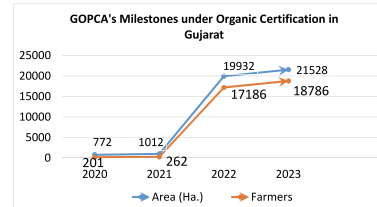

KEY HIGHLIGHTS OF GOPCA'S WORK:
- Third-Party Certification: Impartial inspections guarantee adherence to organic standards.
- Farmer Empowerment: Certification extends to individuals and Organic Grower Groups (OGGs) through an efficient Internal Control System (ICS).
- Growing Network: 18786 farmers are currently registered, collectively managing 21,528 hectares of certified farmland.
- Transparency & Accessibility: Consumers can verify farmer details and certified products via the official GOPCA website.
- Innovation Ahead: The Gujarat Government is exploring advanced digital technologies to establish traceability from "farm to fork", enhancing supply chain authenticity.

GOPCA's commitment to fostering organic farming certification in Gujarat reflects a strategic move towards healthier, sustainable agriculture, benefitting both farmers and consumers alike.

STATUS OF ORGANIC CERTIFICATION IN GUJARAT (GOPCA)

Sr. No.	Certified Organic Area	Area under Conversion	Total Area
1.	12359	9169	21528

Area in hectare

APANU DANG PRAKRUTIK DANG
First District of Gujarat declared as "Totally Chemical Free Farming District"

- 19,871 Ha under natural & organic farming in Dang.
- 7,000 MT of organic production achieved.
- 19,389 farmers engaged in organic practices.
- 10,188 farmers and 11670 Ha area certified under NPOP standards of APEDA
- 7 FPOs with 2,500+ members active in natural farming.
- Boosting production, processing, value addition, and exports via FPOs.
