FUELING THE GROWTH

GMDC FORAYS INTO COAL MINING IN ODISHA

PAVING THE PATH TO ENERGY SELF-RELIANCE

Gujarat's energy landscape has undergone significant growth, driven by the state government's visionary initiatives. Today, the state is power surplus, which has significantly benefited industries and citizens alike, all thriving on Gujarat's robust energy ecosystem. GMDC has played a pivotal role in shaping this energy success. With five lignite mines already operational in the state and six more on the way, GMDC is further strengthening Gujarat's energy future. Additionally, the company has reestablished its Akrimota Thermal Power Station (ATPS) in Kutch, with significant technological overhauls, which now stands as a key pillar of Gujarat's power grid.

As the global energy sector shifts, the need for reliable energy sources has never been greater. Aligning with the government's vision of energy self-reliance, GMDC has strategically diversified into coal mining. Through the commercial coal auction, the company secured three key mines in Odisha-Baitarni West, Burapahar, and Kudanali Lubri-with a combined 2,095 million tonnes of geological reserves. Additionally, GMDC's MoU with GUVNL to develop a 4,400 MW thermal power plant, fueled by coal from these mines, marks a significant step toward addressing Gujarat's energy needs and advancing the nation's energy self-sufficiency goals.

To facilitate coal delivery across the nation, GMDC is constructing a rail line to connect the mines, with key infrastructure projects like Tentuloi Station and the Bhalumanda-Sardega Rail Corridor in place. GMDC's production plan targets increasing coal output, aiming for 15 million tonnes per year from Baitarni West and Burapahar by FY35. Looking ahead, GMDC is focused on expanding its coal operations, enhancing production capacity, and exploring new opportunities in the coal sector to support India's growing energy needs.

Seeking Coal Offtake Partners in Odisha

GMDC is inviting Expressions of Interest (EoI) from partners for long-term coal offtake agreements.

Combined Geological Reserves: Over
2,095 MT

Offtake Period: Up to
5 years
with renewal options

Minimum Bid Quantity
100,000
MT per annum

IMPORTANT DATES

EOI Document Access:
11/11/2024 - 10/01/2025

Bid Submission Deadline:
31/01/2025 by 18:00 hrs IST

For further details and to download the EoI document, visit: **www.gmdcltd.com**
