THE MODI YEAR

HITS

New Parliament Building

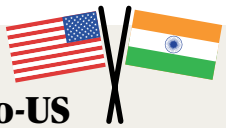

In May, PM Modi opened India's new parliament building, designed to accommodate the expansion in seats and other demands of the House for a full century and more. The construction, which began in January 2021, was completed in a record time of 28 months

Women's Reservation Act

In September, the 27-year-long wait for women's reservation in legislatures ended when the Modi government pushed through the Nari Shakti Vandan Adhiniyam—the Constitution (128th Amendment) Bill 2023 in Parliament that seeks to reserve one-third of seats in Lok Sabha and state legislatures

G20 Presidency

PM Modi rode high on the success of the G20 summit in Delhi on September 9-10, establishing its position as the 'voice of the Global South'. Despite the deep divisions over Russia's actions in Ukraine, India got other nations onboard and pulled off the New Delhi Declaration, without explicitly mentioning the divisive issue

Indo-US Partnership

Under Modi's leadership, the India-US partnership witnessed historic moments—from President Biden's support for a jet engine deal in September, the January launch of the Critical and Emerging Technology (iCET) initiative for strategic security and technology cooperation, record-breaking bilateral trade, to eased export regulations

Criminal Laws Reforms

In December, the Modi government repealed a raft of "outdated" British-era laws. The new laws—Bharatiya Nagarik Suraksha Sanhita, 2023, Bharatiya Nyaya Sanhita, 2023 and Bharatiya Sakshya Adhiniyam, 2023—enhance penalties for crimes such as terrorism, lynching and offences jeopardising national security

Economic Growth

India, currently the world's fifth-largest economy, is also one of the fastest growing in 2023. This sustained growth is the result of the Modi government's emphasis on rapid expansion of digital infrastructure, manufacturing and infrastructure investment
