HYUNDAI IONIQ 5

Hyundai raised temperature levels at the Expo by launching the Ioniq 5 EV at a rather enticing Rs 44.95 lakh. This has been possible thanks to the fact that Hyundai has chosen to manufacture the Ioniq 5 here in India. The Ioniq 5 is powered by a 72.6kWh battery, which will give it an ARAI-certified range of 631km on a single charge. The vehicle also supports 800V charging, which means that one can juice up the battery pack from 10 to 80 per cent in just 18 minutes. The Ioniq 5 is also expected to be rather fun to drive as it sports a rear drive set up. Adding to it is the fact that the motors offer a rather healthy 217bhp and 350Nm of torque.

★ SHOW ★ STOPPERS

MG MIFA9

The Mifa9 is MG's iteration of a big electric van. The big people mover is all about luxury and sport captain seats at the back. The seats are essentially recliners and can be adjusted electrically. The van also sports hi-tech entertainment systems which include dual screens for the rear passengers. The Mifa 9's front row includes a large touchscreen, which spans across the whole width of the dashboard. The Mifa9 comes with a 90kWh battery which offers a WLTP range of 440km. The electric motor powering the van is tuned to offer 245bhp of maximum power and 350Nm of peak torque.

LEXUS LF-30

One of the true showstoppers was the LF-30. The LF-30 sports a sleek design complete with eye-popping gullwing doors which when opened revealed a rather futuristic interior. The technical marvel underneath is powered by four electric motors, one for each wheel. With 544bhp and 700Nm of torque at the disposal of the driver, the LF-30 can get to 100kmph in just 3.8 seconds. Top speed is rated at 200kmph. The LF-30 uses a 110kWh battery pack and has a claimed WLTP range of 500km. What's even more futuristic is the fact that the LF-30 offers wireless charging.
