## RELIGION/ CASTE

While a higher number of Hindus suffer verbal and other forms of violence, Muslims face more physical and sexual violence. OBCs are the most frequent victims overall

## OCCUPATION

Those in service jobs like hospitality etc. face the highest levels of violence, followed by individuals who are jobless, engaged in hard manual labour or in high-paying office jobs

## INCOME, FAMILY

Violence levels drop with higher economic status and also for those living with wives and children. Physical and sexual violence are higher among those who are with male partners

**TYPES OF VIOLENCE**
Verbal Physical
Sexual Any

*Figures denote percentage of gay men who were victims of violence; *higher secondary*

**Note:** *The percentages in each violence category are based on the number of respondents within those groups. For example, of the 300 people surveyed, 110 identified as being in the 18–24 age group. Among them, 80% reported experiencing verbal violence, 45.5% faced physical violence, 37.3% endured sexual violence and 81.8% suffered some form of violence. The totals exceed 100% due to overlap; individuals may have experienced multiple forms of violence*
