WORK WORRY

As 12 million people get added to the Indian workforce every year, the employment situation in the country progressively worsens

A FEDERAL VIEW

J&K and Haryana showed the largest rate of unemployment among states in January 2023, per CMIE data

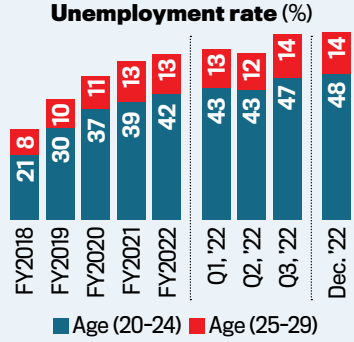

AN UNDESIRABLE HIGH

The number of people seeking jobs peaked in the last month of the previous year

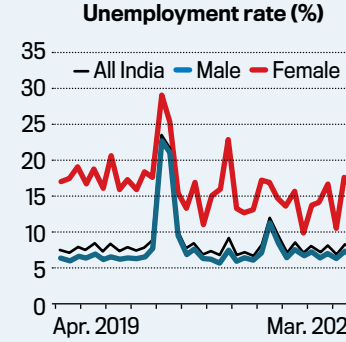

YOUNG AND JOBLESS

Unemployment has been the highest among the country's youth post-Covid, adding up to >50%

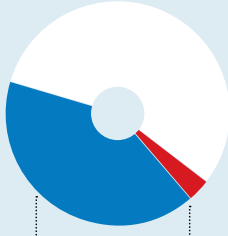

THE GENDER GAP

Female unemployment is higher compared to male, and spiked above the 25% mark during Covid

WORKING POPULATION AND LABOUR FORCE

1,000 MILLION India's total working population (those above 15 years of age)

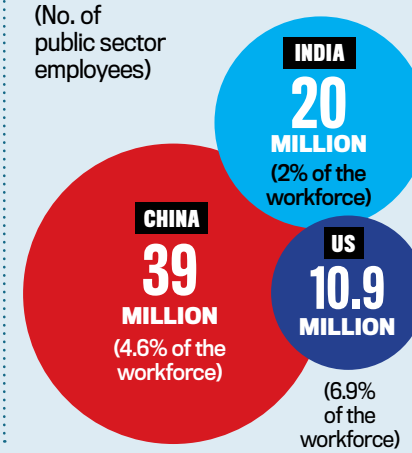

410 MILLION Employed + **33 MILLION** Unemployed (seeking jobs) = **443 MILLION** Labour force

SECTORWISE BREAK-UP OF JOBS

- In 2009, 52.5 per cent were employed in agriculture, 21.1 per cent in industry and 26.4 per cent in services
- This has changed now, with those working in agriculture falling to around 46 per cent, industry employing roughly about the same—21 per cent, and services growing to 32 per cent
- In terms of contribution to the GDP, the share of services has become the highest (54%), followed by industry (26%) and agriculture (20%)

SHARE OF GOVT JOBS IN TOTAL EMPLOYMENT

(No. of public sector employees)
