▲ ENERGY: THE GREEN IMPERATIVE

"In future, we are looking at technology in which Japan is a front-runner, particularly green hydrogen"

AJAY MATHUR
Director General, International Solar Alliance

"With more industries aiming to decarbonise, green hydrogen could be the main enabler"

KAPIL MAHESHWARI
President, Renewable Energy Development, Reliance

"An India-Japan combine can make India a significant exporter of green manufactured products"

VIKRAM KAPUR
Chief Growth Officer, ReNew Power

"Cost is an important factor in hydrogen technologies. This is being discussed everywhere, including in Japan"

SHUICHI ITO
MD, Toshiba India Pvt Ltd

"We talk about 10 buses on hydrogen. It should be 10,000. This is where India and Japan can collaborate"

BHARAT SALHOTRA
Co-founder & President, Insightzz
