LOYMENT OPPORTUNITIES

Beyond distribution, the scheme integrates access to government programs and skill development initiatives through the Digi Shakti Portal, enabling real-time monitoring and fostering connectivity to employment-oriented resources. This ensures that the youth are not only technologically empowered but also actively linked to various opportunities.

The Yogi government is also addressing the specific needs of economically weaker sections within backward classes by introducing employment-oriented training programs. For the financial year 2024-25, an online application process has been initiated under the 'O' Level and 'CCC' Computer Training Scheme, targeting unemployed youth from backward classes. The objective is to provide them with technical education, thereby enhancing their employability and ensuring better career prospects.

Through these initiatives, Uttar Pradesh is paving the way for its youth to embrace a future of opportunities, bridging the gap between aspirations and achievements, and contributing to the state's overall progress.

EMPHASIS ON SELF-EMPLOYMENT

The Uttar Pradesh government, under the leadership of Chief Minister Yogi Adityanath, is focusing on self-employment as a key driver of economic empowerment. To streamline recruitment processes and expand employment opportunities, the state has exempted interviews for non-gazetted Group-B and Group-C posts, while introducing the Preliminary Eligibility Test (PET), which sees participation from lakhs of youth annually. This ensures that the most capable individuals are placed in various roles across the state. The government has committed to providing over 1 lakh government jobs and facilitating 12 to 15 lakh private-sector jobs by actively exploring opportunities in this domain.

Recognizing its role as the largest hub of Micro, Small, and Medium Enterprises (MSMEs) in India, Uttar Pradesh has simplified processes to leverage the sector as a generator of employment. With over 96 lakh MSME units already established, the government has launched the 'Mukhyamantri Yuva Udyam Vikas Abhiyan' (M-YUVA) to promote self-employment among the youth. This initiative acknowledges the MSME sector's significant contribution to the state economy while addressing the employment needs of the youth.

Under this scheme, the government plans to establish 10 lakh micro-units over the next decade, providing financial assistance to 1 lakh educated and trained youth annually. The scheme's goal is to foster employment in both rural and urban areas by connecting youth with self-employment opportunities. The minimum educational qualification for applicants is class 8, with preference given to those who have completed intermediate education.

The scheme offers financial support for projects up to ₹5 lakh in micro enterprises and the service sector, including grants on loans, ensuring that young entrepreneurs have access to the resources they need to succeed. By promoting self-reliance and entrepreneurship, Uttar Pradesh is not only strengthening its economic base but also enabling its youth to contribute actively to the state's growth and development.

> "In the past seven and a half years, our government has successfully facilitated approximately 7 lakh recruitments in government services. The improved security environment in the state has also led to a significant rise in private sector employment opportunities for lakhs of young people. Previously, the youth of Uttar Pradesh had to travel across the country and abroad in search of jobs. Today, they are securing employment within their state, region, and district, enabling them to manage household responsibilities while supporting their families and pursuing their careers."
