

YOGI GOVERNMENT PIONEERS A NEW ERA OF ENTREPRENEURSHIP AND INDUSTRIAL GROWTH

The Yogi government is making significant strides toward transforming Uttar Pradesh into an 'Udyam Pradesh' by enhancing facilities for investors and promoting industrial growth. A key initiative in this effort is the utilization of Nivesh Mitra, a single-window clearance system that has become a crucial tool for facilitating investments. Alongside this, several industrial authorities, including the Uttar Pradesh State Industrial Development Authority (UPSIDA), Yamuna Expressway Industrial Development Authority (YEIDA), New Okhla Industrial Development Authority (NOIDA), and Greater Noida Industrial Development Authority, are taking proactive steps to attract investors and streamline operations.

One of the major developments is the implementation of the Property Management Information System (PMIS) within these industrial authorities. NOIDA is leading the way by integrating PMIS with the Nivesh Mitra Portal, enabling seamless access to vital information such as land bank availability and strengthening the overall investment framework.

To boost foreign direct investment (FDI), the Yogi government has approved an amendment to the Incentive Policy 2023 during a recent cabinet meeting chaired by Chief Minister Yogi Adityanath. This amendment simplifies investment eligibility criteria for FDI and Fortune 500 companies, allowing foreign companies to invest not only through equity but also through loans and other financial instruments. This progressive decision is expected to significantly enhance foreign investment in the state.

The revised policy, now known as the "Foreign Direct Investment, Foreign Capital Investment, and Fortune Global 500 and Fortune India 500 Investment Promotion Policy 2023," will consider foreign investments meeting a minimum of 10% in equity, with the remaining amount (a minimum of ₹100 crore) sourced through debt or other instruments, as eligible for capital investment incentives.

These initiatives underline the Yogi government's commitment to creating an investor-friendly environment in Uttar Pradesh, positioning the state as a prime destination for domestic and international investment.

EXPANDING LAND BANK FOR INDUSTRIAL DEVELOPMENT IN UTTAR PRADESH

The Yogi government is taking significant steps to accelerate industrial development in Uttar Pradesh by ensuring the availability of land for investors. Chief Minister Yogi Adityanath has personally directed industrial development authorities to expedite land acquisition and allotment processes, aiming to eliminate hurdles for investors and facilitate seamless industrial investment.

The state government has set an ambitious target of creating a land bank of over 1.5 lakh acres by 2027 to meet the growing demands for industrial development. By September 2024, a substantial land bank of 54,000 acres has already been prepared, of which 30-40% is designated for industrial use. This land is being acquired and managed by major industrial development authorities such as UPSIDA, Noida, Greater Noida, Yamuna Expressway Industrial Development Authority (YEIDA), and Gorakhpur Industrial Development Authority (GIDA).

For the financial year 2024-25, the government plans to increase the land bank to 82,000 acres, with the remaining land to be acquired and developed over the following two to three years to achieve the 1.5 lakh-acre target. As part of this initiative, 21,751 acres of land have already been acquired in the current financial year, reflecting significant progress toward industrial expansion. Additionally, 5,811 acres of land have been developed and are now ready for allocation to industrialists for various projects.

INFRASTRUCTURE DEVELOPMENT

The Yogi government is prioritizing the development of robust infrastructure to support the state's industrial sector. A significant step in this direction is the comprehensive rejuvenation of 24 industrial areas, led by the Uttar Pradesh State Industrial Development Authority (UPSIDA).

As part of the rejuvenation plan, UPSIDA is employing advanced technologies like Full Depth Reclamation (FDR) for road construction in industrial areas located in Agra, Mathura, Meerut, Gorakhpur, Sant Kabir Nagar, Mau, Kanpur, Lucknow, and Rae Bareli. The development works include:

- **Construction and repair of roads**
- **Installation of street light and CCTV systems**
- **Creation of telephone stations, substations, and street furniture**
- **Development of boundary walls, entry gates, and other essential infrastructure**

These enhancements will cover industrial areas spanning over 4,025 acres, with the Detailed Project Report (DPR) already in preparation to ensure systematic and phased execution.

FOCUS ON BIO-ENERGY AND ENVIRONMENTAL SUSTAINABILITY

The Yogi government also integrates environmental protection into its industrial policies by promoting bio-energy projects. Under the Uttar Pradesh State Bio-Energy Policy 2022, the government has approved a total of 53 bio-energy projects, with an investment worth ₹2,525 crore. Recently, 21 projects proposed by the New and Renewable Energy Department (NEDA) received the nod from the State Level Committee.
