

> Previously, investors were hesitant to invest in Uttar Pradesh, and even those who did often shut down their businesses and left. Over the past seven and a half years, the state's image has undergone a remarkable transformation, both nationally and globally. Today, investors from across the country and around the world are eager to invest in Uttar Pradesh. This shift is evident from the ₹40 lakh crore worth of investment proposals received during last year's Global Investors Summit, showcasing the state's evolving narrative of progress and development.

UPNEDA, which has received investment proposals worth ₹7 lakh crore in the new and renewable energy sector, is focusing on harnessing bio-energy, with ₹57,000 crore worth of investment proposals specifically in this area. Notably, 198 projects for the establishment of compressed biogas, biodiesel, and biocoal plants have been granted in-principle approval.

By combining large-scale infrastructure upgrades with a strong focus on sustainable energy, the Yogi government is laying a solid foundation for industrial growth and environmental stewardship, positioning Uttar Pradesh as a hub for both economic and ecological progress.

FOCUS ON BUNDELKHAND

From the moment Chief Minister Yogi Adityanath assumed office, he has prioritized accelerating industrial development in Bundelkhand, yielding significant positive outcomes. Building on this progress, the government is now advancing the region's growth through the establishment of the Bundelkhand Industrial Development Authority (BIDA).

Under this initiative, a specialized team will be formed to enhance ease of doing business within BIDA. This team is expedite project management and oversee the preparation of a master plan for developing an industrial township. The proposed BIDA Industrial Township aims to attract investments across various sectors, including:

- Medical and pharmaceutical industries
- Logistics and warehousing
- Agro-based industries
- Information technology (IT) and artificial intelligence (AI)
- Research and development (R&D)
- Semiconductor manufacturing
- Solar parks and other renewable energy projects

The team is designate specific zones for sector-focused clusters, develop them, and ensure they are supported with exceptional connectivity and infrastructure. Additionally, it will play a vital role in investment promotion, facilitation, business process re-engineering, and database management to streamline industrial operations.

A key feature of the initiative is the implementation of a State-of-the-Art Geographic Information System (GIS) in BIDA. This advanced system will digitally map and monitor the development stages of under-construction and evolving industrial zones, ensuring efficient progress tracking.

This ambitious project marks the development of a new industrial city in Uttar Pradesh—47 years after the establishment of Noida. The BIDA city, encompassing villages from Jhansi tehsil and surrounding areas, will span a total of 35,300 acres, with the land acquisition process already underway.

With BIDA at its core, the Yogi government is setting the stage for Bundelkhand to emerge as a major industrial hub. By fostering investment and creating world-class infrastructure, this initiative aims to transform the region into a center of economic growth and opportunity.

HOW UTTAR PRADESH SOARED: A JOURNEY OF INVESTMENT AND GROWTH
