

EXPANDING HORIZONS, BRINGING NEW ENERGY

GMDC
FUELING THE GROWTH

Gujarat Mineral Development Corporation Ltd. (GMDC), is one of the leading mining companies of India and the largest merchant seller of Lignite. The six-decade-old organization fuels Gujarat's industrial development by mining Lignite, Bauxite, Limestone, Manganese, Fluorspar and other minerals.

To help India meet its energy demand, GMDC is entering into coal mining in India's eastern parts, at Burapahar in Sundargarh district and Baitarani (West) in Angul district of Odisha. Mining coal here will enhance its capability in meeting the energy demands of the nation, by leveraging the potential of coal as a valuable energy resource.

GMDC has also engaged renowned strategy consultants to usher its transformation through Project Shikhar. Through this project, GMDC is focused on diversifying the portfolio of minerals while engaging in vertical integration through power generation and other means.

Empowered by the infusion of capital and a focus on transformation, in FY 2023, GMDC achieved the highest ever sales and profit turnover in its history. Consequently, GMDC announced its highest-ever dividend as a token of its appreciation for the shareholders.

Going beyond meeting the energy demands of India, GMDC has set its eyes on helping Gujarat and India achieve self-sufficiency in energy. Currently, it generates 200.9 MW through Wind Energy and 5 MW through Solar Energy, and aims to generate 250 MW from Akrimota Thermal Power Plant in Kutch.

Several upcoming projects are going to shape GMDC's future. GMDC is working towards operationalising its Copper Project mine at Ambaji, which also has Lead and Zinc along with Copper. These metals are in demand across the globe but their resources are fast depleting. GMDC's Lignite blocks in Kutch hold huge quantities of cement-grade Limestone, for which GMDC is seeking to partner with large cement manufacturers. It also aims to produce Blue Hydrogen in the near future by gasification of Lignite, which is an initiative towards green mining.

Beyond profit and growth, GMDC also believes in Responsible Mining. GMDC's mining projects are accompanied by GMDC Gramya Vikas Trust (GMDC-GVT), the CSR initiative of GMDC, across 7 districts of Gujarat. It works towards transforming the lives of the communities by upskilling them, promoting inclusive education and making healthcare more accessible.

GMDC is committed to this journey of transformation as it leaps into the future. This transformation is catalysed by strategic diversification and supported by vertical integration.

GMDC is scaling up its Lignite production capacity from 8 MTPA to 10 MTPA to meet the rising demand for Lignite. Additionally, it seeks to serve 30-35% of the state's market and commission 6 new lignite mines.

"As we stride into GMDC's future, our course is guided by the lessons learned from our journey. The remarkable strides in FY 2023, characterized by strategic achievements and unprecedented growth, propel us forward. From our strategic transformation project 'Project Shikhar' to the advancement of energy initiatives and community-centric projects, our direction is clear. In this forward momentum, our commitment to innovation and sustainability remains unwavering. Beyond mere accomplishments, it's about shaping a future that harmonizes with our rich legacy, melding the wisdom of the past with the promise of a brighter tomorrow."
