CREATING WHOLE NEW ECOSYSTEMS

From a new programme in Health Management to another planned on blockchain technology, IIM-Lucknow is aiding innovation and capacity-building

By Ashish Misra

Indian Institute of Management–Lucknow (IIM–L), established in 1984, is the fourth oldest in the prestigious IIM family of management schools. It has scripted several firsts—in 2005, IIM Lucknow became the first IIM to set up a satellite campus exclusively for Executive Education at Noida and was also the first to start a two-year full-time MBA programme in Sustainable Management 10 years back. It also has a long-standing full-time MBA programme in Agri Business Management. Other than steadfastly pursuing excellence in management education, research, consultancy and training, it now aims to develop new ecosystems.

For example, IIM-L has taken the initiative to manage new technology in medical sciences. It has decided to start a postgraduate joint degree programme called 'Healthcare Management' in collaboration with Indian Institute of Technology, Kanpur (IIT-K). An agreement was signed for this by Professor Archana Shukla, director, IIM-Lucknow, and Professor Manindra Agrawal, director, IIT-Kanpur, on September 23. The PG programme will serve professionals from various fields, including healthcare workers and doctors in public hospitals. The course, in collaboration with IIT-K's Centre of Excellence in Digital Health, is designed to blend expertise in medical technology with business administration and seeks to produce leaders equipped to tackle the evolving challenges in healthcare management. "We are thrilled to partner with IIT Kanpur to bring forth a joint programme that combines the strengths of management and technology in addressing the complex challenges of the healthcare sector. We believe the programme will foster innovative solutions that can significantly improve healthcare management," says Prof. Shukla.

Throughout its 40-year journey, IIM-L has touched millions of lives through its academic and executive education programmes, research and consulting. The centres for excellence here include the Centre for Public Policy, Centre for Food and Agribusiness Management, Centre for Business Sustainability and the Centre for Market-

GURUSPEAK

Research and innovation are at the heart of everything we do. By fostering collaboration with industry, we ensure that our research not only advances theory but also has a tangible impact on global business. Through this synergy, we equip future leaders with the tools to create value for society
