

MANEESH AGNIHOTRI

STUDENTSPEAK

"IIM-L's culture of experiential learning and rigorous academic curriculum has allowed me to grow. Focus on time management and problem-solving gave me the tools to handle high-pressure situations"

SAURABH SANDEEP MORE, *PG student*

ALUMNISPEAK

"The intense environment fostered resilience, while the diverse peer group enriched learning. I started my first venture here—a salon for women which is still run by students"

TANIYA BISWAS, *Co-Founder, Suta*

ing in Emerging Economies, to name a few. They regularly carry out evidence-based research that have influenced public policy and management practice.

IIM-Lucknow has also promoted innovation in business. "We are poised to start a Centre of Excellence in Blockchain Technology (CoE-BT) supported by the government of Uttar Pradesh under the 'Start in UP' policy that will nurture 100 start-ups in the blockchain domain over the next five years," says Prof. Shukla. In efforts towards capacity-building, IIM-L has conducted workshops for principals of ITIs (industrial training institutes) and inter colleges; NITI Aayog has appointed IIM-L as 'Lead Knowledge Institute' to conduct studies, workshops for aiding the functioning of the planning department of UP. IIM-L has also incorporated courses on Indian knowledge systems, like the Wisdom of Indian Philosophy, Leadership Journey in Times of Change, Environmental, Social, and Governance (ESG) Management and Reporting.

Situated in a city known for its cultural heritage, the IIM Lucknow campus is spread over 200 beautifully landscaped acres. As befits the city of '*tehzeeb*', IIM Lucknow inculcates human values and professional ethics in students and has taken steps to promote research for the happiness and well-being for students and other stakeholders. In collaboration with the US-based Rekhi Foundation, it set up the Rekhi Centre for the Science of Happiness for the understanding and promotion of mental well-being in September 2023. The centre has set up 'mind-labs', where its unique behavioural research focuses on the application of happiness and well-being. ■
