SPJIMR's emphasis on holistic development, innovation and social consciousness instilled in me values that guide my leadership today. The diverse network forged at SPJIMR has been invaluable in my career

BHASKAR RAMESH
Director – Omnichannel Businesses, Google India
PGDM Class of 2002

Aiding this is the necessary infrastructure—with excellent hostel facilities and a new recreation centre—and a faculty that has a good mix of career academics as well as corporate professionals who chose to leave their professions to take up academics. Nagaraj himself is among the latter—in a career spanning over three decades, he handled senior leadership roles in start-ups and public companies in the US. All these efforts are paying off. In the summer placement, over 100 companies made recruitments from the campus.

Outside of these courses, SPJIMR has been offering many 'non-classroom activities.' Students go for a 4-5-week rural internship where they learn about the market from a completely different point of view—about people and their problems they may not have much exposure to. Students also do a whole year of mentoring with underprivileged children from the neighbourhood that gives them an understanding of urban poverty. In the rural internship programme, students spend time with NGOs active in the rural areas. "For the industry to do well in the market, they need to be innovative and socially conscious in different ways. The courses and the non-classroom activities are equipping our students to do so," says Nagaraj. He relates the story of a student who went for a summer internship at an FMCG firm. There, he was part of a project on market discovery and positioning a product targeting the 'base of the pyramid'. "The student's exposure to both the rural and the urban bottom of the pyramid helped him do a great job and come up with a new product for a new customer segment," says Nagaraj. ■
