

SATHYABAMA'S RISE
BUILDING A STRONGER FUTURE

Sathyabama Institute of Science and Technology is a leading university in India known for its academic excellence and social responsibility, guided by the vision of Chancellor Dr. Mariazeena Johnson. Under her leadership, Sathyabama has become a place where students not only gain world-class education but also learn to contribute positively to society.

Founded in 1987 by Dr. Jeppiaar, Sathyabama offers a diverse range of programs across engineering, law, pharmacy, architecture, and the arts. Recognized among the top universities in India, Sathyabama has consistently ranked in the top 100 by the National Institutional Ranking Framework (NIRF) and holds an "A++" accreditation from the National Assessment and Accreditation Council (NAAC). The university's research facilities are impressive, featuring advanced labs in artificial intelligence, additive manufacturing, and drone technology, allowing students to gain hands-on experience and build critical skills.

Dr. Johnson emphasizes the importance of preparing students for global careers, which is why Sathyabama has over 250 international partnerships with universities and industries worldwide. These collaborations offer students and faculty exchange opportunities, internships, and joint research projects, ensuring they are well-prepared for the global workforce. "Our collaborations are pathways to prepare students for the global stage," Dr. Johnson explains, showing her commitment to broadening students' horizons.

One of Dr. Johnson's key goals is to make Sathyabama an inclusive institution that supports students from all backgrounds. She launched the "ANBU SHE FIRST" program in 2024, providing free health check-ups for women, expected to reach more than 1,000 beneficiaries annually. Through her Anbu Foundation, Dr. Johnson also offers scholarships to about 1,400 students every year from underprivileged backgrounds ensuring access to education for those who need it most. This dedication to inclusion has created a supportive environment where students from diverse backgrounds can thrive.

In collaboration with the Indian government, Dr. Johnson established the *Sathyabama Agri Innovation Hub* in 2022, specifically aimed at empowering tribal women of Jawadhu Hills. This initiative focuses on skills development in millet processing, beekeeping, honey processing, and digital marketing, providing these women with sustainable livelihood options. Rajammal, a participant from Peenjamandhai, shared how the program has introduced her to new cultivation techniques, boosting her income and confidence. Another beneficiary, Vennila from Jarthankollai, expressed, "Through millet processing and beekeeping, I have been able to earn a sustainable income and feel empowered like never before." Dr. Johnson's commitment to economic independence for tribal women exemplifies how Sathyabama's impact reaches beyond the classroom to transform lives in rural communities.

Environmental sustainability is another focus area at Sathyabama. Dr. Johnson is a strong advocate for eco-friendly practices, promoting green initiatives across campus to encourage students to adopt eco-conscious habits. Her efforts are building a culture of sustainability at the university, where students are encouraged to consider the environmental impact of their actions. "Our responsibility extends beyond education; we must care for the world our students will inherit," she says, underscoring her commitment to a sustainable future.

In line with her vision of education as a tool for social progress, Dr. Johnson established the Sathyabama IAS Academy to prepare students for careers in public service. This academy provides guidance for civil service exams, helping students who aspire to serve the nation. For Dr. Johnson, education is about more than individual success; it's about building a stronger society.

Dr. Johnson's work has earned her recognition as one of the "Top 12 Women Transforming India" by NITI Aayog and the United Nations, and she was honored as one of the "100 impactful women of India" by the President of India. Beyond Sathyabama, she supports over 30 foundations and sponsors meals for orphanages, showing her dedication to improving lives and communities across India. Under Dr. Johnson's leadership, Sathyabama University is more than just a place for academic learning. It's a transformative institution where students are encouraged to contribute to society, protect the environment, and work toward a brighter future. As Dr. Johnson says, "Education is not just about imparting knowledge; it's about inspiring individuals to change the world." Through her efforts, Sathyabama University continues to grow as a beacon of hope and progress for future generations.
