THE CHANGED ATMOSPHERE SH

It's an era of global recession, and the foreign investment is decreasing in many countries of the world, but Uttar Pradesh has set an example by recieving investment proposals of more than Rs 34 lakh crores in Global investor Summit amidst the presence of leading investors from country and abroad.
The change hasn't come overnight. The guidance of Prime Minister Narendra Modi and the continuous hard work of Chief Minister Yogi Adityanath in last 6 years is the reason behind it. The change which started from strengthening law and order and the infrastructure of the state in March 2017 with the formation of yogi government in state has now taken the solid shape. It has fulfilled the dream of such an 'Uttam Pradesh' where investors are finding that they are going to get the maximum and secure return of their investment.

Just after creating record by reaching at the helm of affairs of state again in March month of 2022, the Yogi Adityanath government started working on strengthening of industrialisation.

It was never seen before, that to bring industrial investment; a ground breaking ceremony was organized in any state within the hundred days of the formation of the government. As soon as PM Narendra Modi inaugurated the Ground Breaking ceremony by putting his hand on the digital Kiosk, the countdown to bring the investment of 1406 projects, worth Rs. 80224 crores to the ground started. In continuation of these efforts, the Government of Chief Minister Yogi Adityanath started working for organising unprecedented Global Investor Summit. The Yogi government gave a positive signal to the investors by changing and framing the 25 necessary policies related to sectors like Industrial Development, Employment Generation, MSME, Textile and Garmenting and dairy sector.

THE STRATEGY OF ROADSHOW

Chief Minister Yogi Adityanath gave the responsibility of attracting foreign investors for investment in state to the 12 ministers of his government and asked them to conduct road shows in 16 countries between 8th to 19th December. These roadshows which were scheduled in 16 countries were divided into 8 routes. The responsibility of every root was given to a senior cabinet Minister or Deputy Chief Minister. Chief Secretary or Additional Chief Secretary rank officer was deputed for the help of these ministers. On the initiative of Chief Minister Yogi Adityanath the Indian embassy in each country where the roadshow was scheduled had already invited the leading industrialists of that country for the meeting. Along with that, 27 Major policies of the Yogi government were translated into local languages of those countries where the roadshow was scheduled. To eliminate the language related problems, arrangement of translators were also there with the ministers. With the help of these facilities the branding of Uttar Pradesh in front of foreign investors became easy.

"Uttar Pradesh alone has more potential than the big countries of the world. On one side there is the intention of double engine government and on the other side Uttar Pradesh is full of possibilities. There cannot be a better partnership than this. If India is a bright spot for the world today, UP is taking a lead in driving India's growth."

— Narendra Modi, Prime Minister of india
