OWERING INVESTMENT IN U.P.

in Uttar Pradesh can be understood by this fact, that Yogi Government has set the target of Rs 11.25 lakh crores as initial investment for Global Investor Summit 2023. But after receiving the MoUs of Rs 7.12 lakh crores as a result of roadshows in 16 countries, the target was increased to Rs 17.13 lakh crores in December.

After the grand success of roadshows abroad, format for roadshows in the major cities of the country was designed. Investors conference was organised in each district of Uttar Pradesh also. The kind of enthusiasm received in these conferences proved that Uttar Pradesh is fastly moving towards becoming the leader in the industrial sector. Because of these efforts of Yogi Government MoUs of more than Rs 20 lakh crore were signed till 29th January which just after 11 days increased to Rs 32.92 lakh crores on 9 February. On the last day of the Global investor Summit, Chief Minister Yogi Adityanath clearly said that Uttar Pradesh has never imagined to receive investment proposals of more than Rs 34 lakh crore. This shows that the faith of Investors in Uttar Pradesh is increasing day by day.

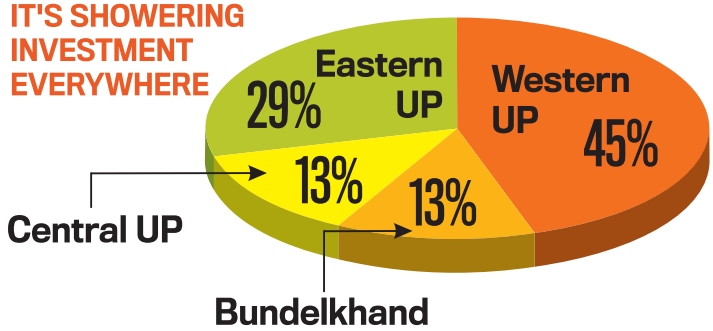

> "Uttar Pradesh will be secure destination for investment. Every investment which will come to the State will help in development and will also prove beneficial for investors. The Summit will help in establishing the state as one trillion dollar economy."
>
> *—Yogi Adityanath, Chief Minister, UP*

FOCUS ON BACKWARD AREAS

The biggest quality of Global Investor Summit was that it broke the regular trend of investment proposals in the state. 42 percent of the total investment proposals and MoUs were focused on Bundelkhand and Purvanchal areas which were lagging behind in the race of industrialisation and development. Sectoral policy formed after instructions of Yogi Adityanath paid special attention to make backward areas leader of development. Events related to investment proposals were not limited to the major cities only. By organising investors meetings in each and every district, all areas of Uttar Pradesh got connected to the biggest ever Global Investor Summit. The possibilities and potential of the Global Investor Summit increased with the help of many awareness programmes which were organised at different platforms including university campuses.

IT'S SHOWERING INVESTMENT EVERYWHERE
