ROAD TO PROSPERITY: MAHARASHTRA SAMRUDDHI MAHAMARG

MAHA SAMRUDDHI CORRIDOR TO USHER PROSPERITY IN DEVELOPMENT BACKLOGGED REGIONS

Hon'ble Chief Minister of Maharashtra, Shri. Eknath Shinde, who test drove for a first hand feel of the Samruddhi Mahamarg is emphatic when he states, "It feels great especially, when you compare the sheer size of the Hindu Hrudaysamrat Balasaheb Thackeray Samruddhi Mahamarg with any similar project in the country. The task was herculean considering the volume of work needed to be carried out, the quantum of material procured, mobilization of 50, 000 workers and the mega logistics involved to utilize large heavy machinery and equipment."

The inaugural of the Nagpur-Shirdi segment of the 701 Km Maharashtra Samruddhi Mahamarg at the august hands of the hon'ble Prime Minister of India, Shri. Narendra Modi Ji in the presence of hon'ble Chief Minister of Maharashtra, Shri. Eknath Shinde Ji and Deputy Chief Minister, Shri. Devendra Fadnavis Ji took place in December 2022. On this auspicious occasion the hon'ble Deputy Chief Minister has praised the exemplary efforts of the officers to ensure the smooth and timely completion of the Maharashtra Samruddhi Mahamarg.

Hon'ble Deputy Chief Minister applauded Shri. Radheshyam Mopalwar, Vice Chairman & Managing Director, MSRDC, Shri. Manoj Saunik, Additional Chief Secretary (Finance and PWD) and Shri. Anilkumar Gaikwad, Joint Managing Director, MSRDC, involved in the successful implementation of the project.

The 701 km Maharashtra Samruddhi Mahamarg is truly a one-of-a-kind, 'Game Changer' project built by MSRDC. It is the first time in India that a road has been designed and built for travel at speed of 150 km per hour.

More importantly, the twin parallel corridors adjacent to the fast-track highway will witness the laying of railway tracks for a dedicated freight corridor as well as an optic fiber network for a new age modern end-to-end infrastructure model for the rest of Bharat (India) to emulate.

This will directly benefit commuters through money saved by fuel optimization and on vehicle maintenance besides ensuring significant reduction in air pollution. New townships are envisaged alongside the entire route map of the Maharashtra Samruddhi Mahamarg, that will handhold lesser developed regions in the State to catch up with the state's benchmarked high economic growth standard in real time.

'Krushi Samruddhi Kendras' will be set up around the entire roadway for agro-based industries unleashing opportunities for employment, self-employment and for predominantly farming communities to improve their agricultural income. Non-farm-based
