MR. ANIL JAIN AND HIS TRAILBLAZING STORY OF SUCCESS

ANIL JAIN
CHAIRMAN
ROOP POLYMERS LTD

Relocating from one place to another for work is a calculated move. It augurs well for those who are responsible and hardworking. In this case Late Shri Mr. M.G. Jain, moving from Jammu to Gurugram in 1960 proved a wise decision. He started an independent business in 1973 and Mr. Anil Jain joined almost at the same time. With his zeal and passion to excel, Mr. Anil Jain took on his shoulders to create a big conglomerate. The present Chairman of the flagship company Roop Polymers Ltd, he has accumulated more than five decades of fulfilling experience in the arena of rubber and plastic component manufacturing. In addition, he has a true drive to take up philanthropic causes and work for them with tireless zeal. Armed with a BSc. degree and a diploma in rubber technology, he began his work odyssey with all of seven staffers. This has snowballed into a four thousand employee outfit as on date. The Roop group has no less than nine manufacturing plants pan India and Mr. Anil Jain has add-on figures in his cap of feathers of being a Director at Roop Rubber Mills Pvt. Ltd., Director at Roop Koepp Foam Technology (An Indo-German joint venture), same position at Roop Meiji Flow Systems (A Japanese Technical Venture) and at Roop Techno Polymers Pvt. Ltd. (A JV with Techno Kaucuk of Turkey), et al.

He is the proud recipient of the Haryana Rattan Award in 2016 in the arena of business and social services and is currently the Chairman of JITO Gurugram (Jain International Trade Organization) and President of the Jain Sant Phool Chandji Charitable Hospital in Gurugram. He is the former executive member of the Honda Suppliers Club in 2017-18. To further pummel his elegant aura of goodness, we are happy to mention that he is the former Vice-President and a current member of the Mahavir International (an NGO for education, women empowerment and health), was a member of the Gurugram Industrial Association in the Gurugram Chamber of Commerce and Industry, ACMA, IMT Manesar,et al.

It is a fact to preen about that this group, begun with an initial investment of just Rs. 14,000 has metamorphosed into a ripe consortium poised on the threshold of resounding success. Primarily involved in manufacturing rubber and plastic - molded and extruded components, the high-end facilities here are equipped with the state-of-the art tool rooms, paint shops, modern manufacturing machines and world class testing equipment. Engaged also in the domain of EPDM rubber foam, semi-closed cell and open cell arenas, a recent foray here into critical rubber and plastic components for white goods industry is also making viable headway.

Mr. Anil Jain, who believes that "we are the only TPM Rubber company in India", makes it a point to ensure safety and quality a priority in all his work units. With approximately 4000 employees in the RPL Group itself, they are extremely conscious of their social responsibility in the field of health, education & environment and were the first in their category to proffer employment opportunities to the specially abled way back in 1990. The one ethos that hallmarks this umbrella of companies is that they have registered an employee retention rate of over 90% and a client retention rate of a whopping 98%. Well-recognized employee engagement activities like proper promotions, increments and development through training have played their role in enabling sky-high success. Constant research and development paraphernalia is in the works and a new R&D centre is coming up and should begin operations in the next half year.

Having logged a turnover of Roop Polymers Limited of Rs. 450 Cr in FY 2021, that of Rs. 550 Cr in FY 21-22 and Rs. 675 Cr in FY 22-23 (does not include turnover of other group companies), shows continual growth. The outstanding USP here is that this group is a one-stop solution for rubber, plastic – molded (painted and non-painted) and extrusion painted products. When one takes stalk of the products here, these can be categorized into the two-wheeler, passenger vehicle, commercial vehicle and the three-wheeler segment, along with non-auto offerings. Air filtration products, suspension bushings, cylinder head covers, insulators, air filtration ducts, hydraulic brake hoses, bonnet seals, rubber profiles with or without metal inserts, painted mud guards, steering components, bump stoppers like more than 6000 variety of products, are a part and parcel of the catalogue.

The Gold Award in ICQCC at the international level, the JIPM Award and a whole range of other accolades, signals in the sparkling work narratives of company. It distinguishes itself from the competition by being the "Supplier of Choice" with all major Automobile companies today.

Happily enough, the vision and the goal of this organization for the coming half decade is to mushroom into a Rs. 3000 Cr turnover mammoth unit. For this, "We are willing to burn midnight oil and pour in our blood and sweat". Mr. Anil Jain, the stellar stalwart who signs in to the philosophy of sheer hardwork and in the blessings of his senior citizens in the family fold, is a role model of sorts for the younger entrepreneurs. All this would not have been possible without the support of his younger brother Mr. Hitesh Jain, presently the Vice – Chairman of Roop Polymers Limited. The younger generation of entrepreneurs, have joined and are ably taking the organization to newer heights. Thus, at end-point, it is important to note that Mr. Anil Jain is a hugely inspiring personality with a large body of motivating work to showcase to his peers and contemporaries, alike. The group he has built completely on the strength of his brilliant abilities and willingness to take chances stands tall and high in its field.

Mr. Anil Jain wishing everybody "Jai Shri Ram"
