

2.67 acres
Area of the main temple

70 acres
Total area of the temple complex

732 metres
Length of Parkota, along which six more temples are being built

392
No. of pillars supporting the structure

46
Total doors (made of teakwood)

AATMANIRBHAR COMPLEX

- The temple complex will be self-reliant with two sewage treatment plants and one water treatment plant
- A dedicated electricity line will illuminate the premises
- A fire brigade post present in the complex will source water from an underground reservoir

PILGRIM FACILITIES

- Ramps and lifts have been built for the elderly and physically challenged devotees
- There's a separate block in the complex with a bathing area and washrooms
- A centre with medical and locker facilities will cater to 25,000 pilgrims

THE IDOL

- The Balak Ram idol stands 51 inches tall and weighs 150-200 kg
- It is made of *krishnashila*, or black sandstone, excavated from Gujjegowdanapura village in Mysuru
- Its sculptor, 42-year-old Arun Yogiraj, also comes from a family of sculptors based in Mysuru
- The idol is adorned in a yellow dhoti made of Banarasi fabric, with a red *patka* or *angavastram*, embellished in pure gold *zari*
