EPIC TRANSFORMATION

Encompassing connectivity, accommodation and other amenities, this is the infrastructural grid over which the New Ayodhya vision is being mounted. Hitherto a typical north Indian small town merely 78,000-strong, it is seeing a complete metamorphosis. Says Ayodhya district magistrate Nitish Kumar: "The Ayodhya town now has almost every facility that any Tier-2 city has, from an international airport to a five-star hotel, broad roads to an app-based taxi service. All pending projects will be completed in the next few years."

₹50,000 CRORE
Estimated cost of development projects for New Ayodhya
