### The Road Ahead

"Government schools will have to [compete with private schools]. Private institutions have their own resources, fee structure and all those things. We don't have that. But it's our government's commitment that we give equality, quality and accessibility.... We want to open 500-plus Karnataka Public Schools. We have about 300 schools with a strength of [around] 1,000...look like any other private school"

**MADHU BANGARAPPA**
