Social Change Through **Emotional Wellness**

Sleepwell Foundation
Wake up to a New India

Emotional Wellness is crucial in today's world, profoundly influencing every facet of our lives. It is integral to a person's overall health and well-being, serving as the cornerstone for a healthy society. In India, the susceptibility to mental stress is escalating alarmingly, particularly among youth and women, due to a myriad of societal and self-imposed pressures.

Emotional Wellness is especially critical for youth, and more so for girls, in the current milieu. They encounter distinct pressures and challenges that substantially affect their emotional health. The swift pace of life, coupled with evolving societal norms and digital influences, often leads to heightened stress, anxiety, and other mental health concerns.

Unfortunately, Indian youth often have limited awareness of these issues. There is a pressing need for continuous and targeted efforts to raise awareness about Emotional Wellness and to educate the youth rather than waiting for them to fall prey to Mental Health issues. Bringing this consciousness to the forefront will enable them to proactively take charge of their emotional health.

SLEEPWELL FOUNDATION: A PILLAR OF SUPPORT

Recognizing the criticality of this issue, Sleepwell Foundation, the CSR arm of Sheela Foam Limited, under the able leadership of its Managing Trustee, Ms Namita Gautam –
steps in as a key player in fostering proactive Emotional Wellness with a particular focus on the under-privileged and those on the margins of society. The Foundation is committed to creating mass awareness to enable the people to be proactive about their Emotional Wellness.
