

1. Kashmir Saffron
(Jammu & Kashmir)

Kashmir Saffron, cultivated in the Karewas of Jammu and Kashmir, stands as a symbol of the region's pristine beauty and agricultural excellence. Grown at altitudes of 1600m to 1800m, this saffron is distinguished by its high aroma, deep colour, and long, thick threads. The traditional method of separation, unique to Kashmiri farmers, enhances the saffron's natural and organic qualities. Being chemical-free and preferred for its safety, Kashmir Saffron aligns with the broader push for organic and healthy products.

2. Kashmir Pashmina
(Jammu & Kashmir)

The artistry of Kashmir Pashmina reflects the heritage of Jammu and Kashmir. Woven from Pashm, the fabric comes in three qualities, with the fineness of the yarn and tension of the weave being key assessments. The weaving process involves various techniques, such as Twill, Diamond, and Herringbone weaves, each contributing to the distinctiveness of the final product. Pashmina, with its roots in addressing the severe winter weather, serves as both a testament to craftsmanship and a utilitarian textile.

3. Kani Shawl
(Jammu & Kashmir)

Crafted by skilled artisans in Jammu and Kashmir, Kani Shawls showcase intricate twill tapestry weaving using eyeless wooden spokes called Kanis or Tujlis. These shawls represent a delightful expression of handcraft, involving specialized techniques and a rich tradition. While originally produced from fine handspun Pashmina wool, contemporary Kani Shawls incorporate silk and other fine wools. The emphasis on colour schemes and the involvement of traditional dyers highlight the meticulous craftsmanship and attention to detail.

4. Ladakh Raktsey Karpo Apricot
(Ladakh)

The unique Ladakh Raktsey Karpo Apricot thrives in the high-altitude regions of Leh and Kargil. Its white seed stone sets it apart from other apricots, contributing to its exclusivity. Known for its sweetness, vibrant colour, and high Total Soluble Solids (TSS), this apricot variety has become a preferred choice for fresh consumption. Raktsey Karpo Apricot is a testament to Ladakh's agricultural diversity and the significance of indigenous fruits.

5. Uttarakhand Tejpat
(Uttarakhand)

Uttarakhand Tejpat, a variety of Indian Bay leaf, grows in the Himalayan region, flourishing at altitudes from 500m to 2400m. With its delicate, sweetish, sharp, and spicy aroma, Tejpat plays a vital role in Indian cooking. Collected from both wild and cultivated plantations, the leaves are valued not only for culinary purposes but also for their aromatic properties. Uttarakhand Tejpat embodies the rich biodiversity of the Himalayan foothills.

6. Munsyari Rajma
(Uttarakhand)

Munsyari Rajma, grown in the mineral-rich soils of Uttarakhand's high-altitude areas, is not just a culinary delight but also a source of soluble fibre. With cultivation taking place between 1600m to 2700m, this variety of rajma holds cultural and economic significance. The involvement of local women in the cultivation process adds a layer of empowerment, aligning with broader initiatives promoting sustainable agriculture and rural livelihoods.

7. Phulkari
(Punjab, Haryana & Rajasthan)

Phulkari, a traditional embroidery form, has transcended its Sikh roots and become a craft practiced across Punjab, Haryana, and Rajasthan. The intricate geometric or floral designs, even stitches, and vibrant colour combinations characterize Phulkari. Its evolution from a regional craft to a pan-northern tradition showcases the adaptability and enduring appeal of such indigenous art forms.

8. Chamba Rumal
(Himachal Pradesh)

Chamba Rumal, a pictorial craft originating from Himachal Pradesh's Chamba Valley, represents a unique embroidery tradition. With roots dating back to the 17th-18th centuries, Chamba Rumal involves double satin stitch techniques, creating strikingly identical patterns on both sides. The use of a diverse colour palette and handspun khaddar adds to its cultural richness. Chamba Rumal is a testament to Himachal's artistic heritage and the resilience of traditional crafts.

9. Himachali Kala Zeera
(Himachal Pradesh)

Himachali Kala Zeera, also known as Black cumin, holds economic importance in the medicinal plant and spice industry. Growing wild in the dry temperate regions of North Western Himalayas, this small, grassy plant produces seeds that have both culinary and medicinal applications. The cultivation, carried out in specific regions of Himachal Pradesh, highlights the synergy between traditional practices and the rich biodiversity of the Himalayan ecosystem.

10. Basmati Rice
(North India)

Basmati Rice, a traditional crop grown in North India, particularly in states like Punjab, Haryana, Delhi, Himachal Pradesh, Uttarakhand, and parts of western Uttar Pradesh and Jammu and Kashmir, has earned global recognition. The exceptional characteristics of Basmati rice, including its long and slender grain, exquisite aroma, and agro-climatic requirements, contribute to its premium status. The GI status protects and promotes the authenticity of Basmati rice from this specific geographical region.

11. Banaras Brocades And Sarees
(Uttar Pradesh)

Banaras Brocades and Sarees, produced in the Varanasi district of Uttar Pradesh, are synonymous with opulence and elegance. Known for their intricate gold patterns, heavy work, and vibrant designs, these textiles have a rich history. While originating in Varanasi, the production has extended to neighbouring districts, showcasing the
