cultures and unique traditions. The government has adopted a multifaceted approach, encompassing awareness campaigns, policy development, training programs, and international collaborations, reflects a deep understanding of the importance of GI in preserving cultural heritage, promoting economic growth, and positioning India as a leader in the global market.

As a part of the hallmark campaign 'Culture Unites All', CWG of India's G20 Presidency, Ministry of Culture, Government of India, set the **Guinness World Record** for the largest display of Lambani items created using GI-tagged Sandur Lambani embroidery- during the 3rd G20 CWG meeting at Hampi, Karnataka created by over 450 Lambani women artisans.

This strategic choice resulted in global brand building and recognition of the GI-tagged Sandur Lambani embroidery's rich tradition through cross-cultural appreciation and understanding among G20 nations. The successful hosting of the G20 Summit in Srinagar had a significant impact on the demand for Jammu and Kashmir's handicrafts. The GI tagging notably boosted the region's handicraft and handloom sector. In the aftermath of these events, the first quarter of 2023 witnessed an impressive export figure of Jammu and Kashmir handicrafts, amounting to more than Rs 200 crore. This surge in visibility due to the unique GI tagging played a pivotal role in elevating their market value and positioned Jammu and Kashmir's handicrafts as sought-after commodities in the global market.

Further, the G20 Summit held in Delhi provided a prestigious platform to showcase India's rich heritage and craftsmanship. A key component of this grand event was the 'Crafts Bazaar,' strategically designed to exhibit the diverse range of handicraft products from different corners of India. One of the distinctive features here was the inclusion of live demonstrations by master craftsmen. This added a dynamic element to the exhibition, allowing visitors to witness the intricate processes involved in crafting GI-tagged items. Traditional art forms like Gond Painting, Warli painting, Pithora painting, Shamphee Lanphee, Sandur Lambani Embroidery, and Odisha Pattachitra were not just exhibited but also demonstrated, providing International visitors with a first-hand experience of India's vibrant cultural heritage.

Looking ahead, the DPIIT's vision, guided by Prime Minister Narendra Modi's foresight, presents a roadmap for a transformative future. The confluence of GI with flagship initiatives like 'Make in India,' 'Vocal for Local,' and 'Local to Global' amplifies the impact, fostering a self-reliant India. Export incentives have also been planned to further elevate the status of GI products in international markets. A systemic media policy, proposed at both central and state levels, aims to broadcast the story of GIs, weaving them into the fabric of national identity. Collaborations with e-commerce giants and marketplaces further broaden the reach of GI products, ensuring they find a place in the digital landscape. The emphasis on collaborations extends to international platforms, with efforts to showcase Indian GIs at World Intellectual Property Organisation (WIPO) seminars and exploring

e-commerce partnerships. The One District One Product (ODOP) initiative emerges as a catalyst, aligning with the Prime Minister's vision for balanced regional development. Showcase events, awareness campaigns, and global exhibitions underscore the tireless efforts to integrate GI products into the global marketplace. Leveraging these regional specialties through global mega events such as the recent G20 Summit not only sustains traditional practices but also serves as a bridge between generations, ensuring the continuity of India's rich cultural tapestry.
