

IGL CELEBRATES 25 YEARS OF FUELLING CLEAN CHANGE

Indraprastha Gas Limited (IGL) established in 1998, created history with the successful introduction of Compressed Natural Gas (CNG), a clean fuel alternative for automobiles. In 1999, the first fleet of public transport fuelled by CNG, plied on the roads of Delhi NCR. Consequentially, people realised the benefits of converting their vehicles to CNG, which resulted an exponential growth in demand of CNG. Today, IGL has completed 25 successful years of unstoppable juggernaut in terms of growth and serving its burgeoning customers in the CNG, PNG Domestic, Industrial and Commercial segments. Committed to achieving Net Zero Carbon Footprint by 2040, IGL, worth Rs.7000 Crores is propelling its next level of growth on the strength of its experience, technology, innovation and commitment towards building an Atma Nirbhar Bharat.

In the later end of the 90's, India was forging its path towards the unprecedented upward trajectory of the big economic boom, and with it emerged many players in the public and private sectors, including entities such as IGL. Backed by strong promoters - GAIL (India) Ltd. and Bharat Petroleum Corporation Ltd, IGL has grown from strength-to- strength registering an incredible growth from Rs.3500 Crores in FY18 to Rs.7,000 Crores in FY22.

IGL is committed to achieve its goals of providing safe, convenient and reliable natural gas supply to its domestic and commercial customers. Today, the company is supplying natural gas as Compressed Natural Gas (CNG) to the transport sector, Piped Natural Gas (PNG) is fuelling the needs of domestic, commercial and industrial establishments.

As a company for providing

a cleaner, environment-friendly alternative as auto fuel, IGL is focused on an aggressive roadmap for expansion into areas of NCT of Delhi, including districts of Gautam Budh Nagar, Ghaziabad, and spread as far as Hapur, Muzaffarnagar, Shamli, Meerut, Kanpur, Fatehpur, Hamirpur, Banda, Mahoba and Chitakoot in Uttar Pradesh and districts of Rewari, Gurugram, Karnal and Kaithal in Haryana, besides Ajmer, Pali & Rajsamand districts in Rajasthan. The ambitious expansion plan of IGL into these regions will drastically bring down the particulate matter pollution, thereby, creating a healthy environment for sustainable living. IGL is the pivot around which the transition to clean fuel is envisaged not only in India, but other countries too.

In its 25 years and vision beyond, IGL, will work on enhancing scalability of its infrastructure to cope with the increasing demand of CNG, as automobile manufacturers are lining up new models of their vehicles in CNG variants and the Delhi Government making it mandatory for all LCVs operating in Delhi to run on CNG. IGL is poised crucial role to play in the emerging scenario, which not only includes augmenting its compression capacity by adding new stations but also investing in new age fuel like LNG, CBG and Hydrogen.

Scripting the success story of 25 years, is IGL's cohesive team of highly motivated technocrats, the best in the industry, and professionals who have enriched the value chain with their experience and innovative approach. Acknowledged for its strong commercial orientation, IGL has adopted best operating practices to grow as an organization that encourages learning opportunities in an evolving industry and maintaining high quality standards to offer the best of customer service, which lie at the core of its philosophy.
