

Mr. Kamal Kishore Chatiwal
Managing Director

What is your vision as the MD of one of India's largest city gas distributors?

- To consolidate our position as top CGD company of the country by targeting volume growth in existing business areas aiming to reach 10 mmscmd sales volume, 1000 CNG stations and 12000 I&C customers and 3 Million D-PNG connections by FY 25.
- For this we plan to invest aprox. Rs. 5000 crores over the next two fiscal years in our core CGD assets in the ratio of 60:40 existing to new geographical areas with IGL in Delhi, UP, Haryana and Rajasthan.
- The company is all eager to diversify into newer business areas namely renewable energy, EV charging, LNG retailing, ethanol, allied manufacturing, Green Hydrogen to augment Non-CGD revenues. We aim to derive 10 % of our revenues from these segments.
- The company wants to further consolidate it's position as a green fuel leader for which it has ventured into CNG based Intercity Buses & logistics segment, LNG based long distance trucking/ Cargo and Small Scale LNG (SSLNG) to provide LNG to the public within our GAs. Our first LNG station is already operational in Ajmer and IGL has already entered into an MoU with CONCOR to support their pan-India captive LNG demand.

This year we are completing 25 years with which we want to usher a new paradigm for the company, IGL 2.0, wherein the company will transform itself into an agile organization focused on customer delight entailed on the path of rapid and sustainable growth.

How has IGL been able to connect with the customers?

- We are increasing the number of CNG stations & PNG network, strategically located in each and every district that we operate, so as to reach out to the maximum customers for their clean energy needs in both CNG as well as PNG segments.
- Over the years, IGL has developed an ecosystem that has made its mark in the industry and has become a standard practice for rest of the CGD entities.

IGL has many first in CGD industry to its credit including arranging of long awaited type approval for BS-VI CNG kits vehicles, high capacity TYPE – 4 cylinders, Coordinating with OEM's for company fitted CNG vehicles.

- With rising AQI levels in the national capital, various statutory bodies have already mandated switching of industries to natural gas. IGL is working at a fast pace to ensure last mile connectivity in every industrial area within its area of operation so that PNG is readily available.

Mr. Pawan Kumar
Director (Commercial)

THE GOLDEN ERA BEGINS...

1997 – GENESIS
Signing of MoU for joint venture agreement for Delhi City Gas Distribution project with GAIL & BPCL
First PNG connection in Delhi
Inauguration of CNG mother station

1998 – COMMENCEMENT
Incorporation of Indraprastha Gas Limited;
23rd Dec'1998

1999 – CNG INAUGRATION
IGL took over Delhi city gas distribution project in Feb'1999
IGL CNG station started at Sarojini Nagar

2003 – BEGINNING OF A NEW MILLENNIUM
