ARCHITECTURAL VISIONARIES

FOUNDER AND DESIGN IDEATOR STUDIO IAAD (IT'S ALL ABOUT DESIGN) CO-FOUNDER, ZOERA

For Rachna, design is a discipline that harmonises spaces, blending natural environments with a style accentuating sensorial spatial experience. For over 25 years, Agarwal has been crafting signature designs across multiple typographies and typologies.

In 2007, she co-founded Studio IAAD (It's All About Design). This unique idea approached design from a boutique mindset and the implementation capability of a large-scale firm with sustainable processes. No wonder IAAD is recognised today as an award-winning architecture and interior design firm.

Along the way, Rachna also spotted an opportunity to offer curation of high-end and stylish private residences. Thus, she co-founded ZOERA, a design studio that curates extraordinary private residences. Besides sensitive design, ZOERA transforms private residential spaces through hands-on collaboration on furnishing and fixtures—a service most desired by today's affluent clientele.

"Whether a public zone or a private residence, every space designed by us carries a narrative that embraces diversity, tells stories, and makes our end users smile," says Rachna.

Rachna's sensibilities, leadership and outstanding contributions to architecture and design have won her multiple awards, including Realty+ Women Icon Awards for the category 'Women Achievers in Leading Flexispaces'; Architecture+Design – 'Best Designer' award for open spaces; Global Architecture and Design Award, Delhi Architecture Festival; multiple IIID awards, Young'13 Designers, etc.

The Spokesperson is Rachna Agarwal, Founder and Design Ideator, Studio IAAD.

MO DESIGN STUDIO CO

PRITIKA MANJREKAR

Visionary Architect, Pritika Manjrekar, has a unique offering. She not only translates her client's aspirations into visions but also enables them to convert these visions into reality.

Pritika founded MoCo Design Studio in 2006 in California and moved its headquarters to Pune in 2008. She is now doing projects across India.

Her practice has evolved through 20 years of rich experience with 50+ projects spanning over 15 million square feet of designed spaces.

The studio is a team of experts excelling in design and technical mastery across commercial, institutional, residential architecture.

Pritika says "*The key is in taking* ***ownership*** *towards the project. Clients' biggest challenge is how complex projects have become in our country today. As a leader we understand each stakeholder's requirements and frustrations that could arise. We then transmute them into a* ***win-win design solution*** *that caters to all.*"

Pritika measures the impact of her projects by how they **make people feel**.

This includes both the feelings experienced by the client and the team during the making of the project, as well as the feelings experienced by the end users, visitors, and the passersby.

Amar Business Zone, AP 81, Poonawalla Towers, RTSE School by Bharati Vidyapeeth, Amar Landmark, Manhattan are some of her most recognized projects.
