THE TITANS

DR. HARPRIT SINGH
LEADING INNOVATIONS IN ORTHOPAEDIC CARE

Embark on an exploration of the extraordinary journey led by Dr. Harprit Singh, a luminary in orthopaedics, as he, through his hospital in Jalandhar – Orthonova, has revolutionised the field with over 40,000 joint replacements and 57,000 plus orthopaedic operations in a period of 25 years.

In a recent conversation, Dr. HARPRIT SINGH, a distinguished figure in the field of Orthopaedics, shared with INDIA TODAY, his commitment and passion for bringing the best of orthopaedic care to India. Together, they delved into his journey, unraveling the efforts that have elevated Orthonova to its renowned status in the healthcare landscape today.

Born in the heart of Jhansi to a valiant army officer, Dr. Harprit Singh's early years were marked by a spirit of discipline and ambition. His educational pilgrimage found its roots in the hallowed halls of Kendriya Vidyalaya, where influential teachers ignited the flames of purpose. The pursuit of medical knowledge took him to Dayanand Medical College (DMC), Ludhiana, where he emerged adorned with an MBBS, MS (Ortho), and M. Ch, bedecked with four gold medals, three silver medals and 4 distinctions.

Post-academic triumphs, Dr. Harprit ventured into the dynamic realm of orthopaedics at a hospital in Jalandhar. However, it was his indomitable passion and an unwavering determination to alleviate the suffering of others that sowed the seeds of Orthonova. Starting in humble rented quarters, within a mere three years, he orchestrated a monumental shift to a self-owned edifice, materialising his vision into a bastion of hope.

Reflecting on the early days of setting up Orthonova, he reminisces, "After starting from a rented space, it took three years to shift to our own building. It was a transformative journey turning a vision into reality. Orthonova, from its inception, aimed to be a haven for those seeking orthopaedic care, and today, I feel both humbled and proud to have accomplished this goal."

Today, Orthonova stands as a NABH Accredited institution. The only one of its kind in the whole of North India.

Dr. Harprit's quest for excellence led him to traverse continents, earning fellowships from venerable institutions across the globe. From Exeter in England to Napean Hospital in Sydney, Australia, and multiple others in Germany, France, and the United States, his global sojourn enriched his expertise. The hallmark of his commitment is reflected in Orthonova's distinguished status, boasting a commendable zero % infection rate, a rare feat in the global medical arena.

INNOVATIONS IN ORTHOPAEDICS: A TRAILBLAZING ODYSSEY

Driven by a commitment to bring innovations in orthopaedic surgeries, Dr. Harprit Singh was the first one to bring the groundbreaking Oxford knee replacement in North India, setting the stage for a series of medical milestones. The narrative takes an intriguing turn with the introduction of Stitchless Endoscopic Spine Surgery, a technique he has performed over 980 times. This revolutionary method has become a symbol of hope for individuals grappling with disc and spine issues, offering not only relief but also a quicker recovery period.

Dr. Singh's transformative touch extends to knee replacements, introducing the Stitchless Knee Replacement and the ROSA Robotic Knee Replacement – a technological advancement and a first in North India.

In his own words, "In the realm of orthopedic procedures, my aim is to remove fear from the minds of people regarding orthopaedic care. At Orthonova, we prioritize quick, nearly painless surgeries. For knee replacements, it
