takes just 10-12 minutes. I aim to show that modern orthopaedic care is fast, effective, and not as scary as thought."

Reckoned to be a torchbearer in the field of Orthopaedic Surgery, Dr. Harprit Singh has carved a niche in his field of expertise and left and indelible impact on all of his patients spread across the globe. His appreciative clientele from all around the world, be it Germany, France, Italy, Australia, China, Saudi Arabia, USA, Russia, Middle East and Africa stands testament to his persistent zeal to put his knowledge and wisdom to benefit the humanity at large. In a trailblazing career spanning across about three decades, Dr. Harprit is has successfully carried out Knee & Hip replacement, Endoscopics spine surgeries, ACL & other sports injuries, Trauma management with treatment of complex fractures, cold surgeries like CTV, Pot spine, OsteomieseTendontransfer, Bone lightening and many more.

ENDOSCOPIC SPINE SURGERY – THE PETER VAN DAELE TECHNIQUE

Orthonova is Indias No.1 Endoscopic spine surgery centre wherein with the Peter Van Daele Technique, The super spine master Dr, Harprit singh makes the patient walk in one hour and out of the hospital either on the same day or the very next day.

Dr. Harprit Singh has pioneered the adoption of advanced orthopaedic techniques, particularly in the realm of Endoscopic Spine Surgery. The Peter Van Daele Technique, a groundbreaking approach to spinal surgery, distinguishes Orthonova as a leader in the field.

INTERLAMINAR ENDOSCOPIC SPINE SURGERY ONLY IN 2 CENTRES IN INDIA (ORTHONOVA IS NO.1)

STITCHLESS ENDOSCOPIC SPINE SURGERY - A BOON FOR RELIEF

Embark on a transformative journey at Orthonova, where Dr. Harprit Singh introduces the revolutionary Stitchless Spine Surgery, a pioneering technique first in India. With over 980 individuals finding respite from disc and spine problems, Dr. Singh's meticulous approach, utilizing state-of-the-art equipment from Germany, is reshaping orthopedic care.

This unique procedure, performed without stitches, offers a boon to those burdened by severe pain, stress, and restricted mobility. Old individuals grappling with degenerative disc disease or nerve compression can now walk within one hour, unveiling a world where years of sciatica or disc pain dissipate in just a day.

Assessed by a standing MRI, this method ensures reduced risks of spinal infection and expedites wound healing. Dr. Harprit Singh shares, **"Witnessing the joy and gratitude of those we serve, particularly the elderly, is the true wealth of my practice. Their smiles and blessings are my real earnings."**
