

UTTAR PRADESH SOARS TO NEW HEIGHTS: HELICOPTER SERVICES TO ELEVATE TOURISM AND CONNECTIVITY

Uttar Pradesh is making significant strides in tourism and connectivity and recently achieved the fifth position for having the most foreign tourists inflow among Indian states and the first position for hosting the maximum number of domestic tourists. To enhance connectivity, helicopter services are being introduced across the state at prime tourist destinations, starting with Mathura and Agra.

Initially, six-seater helicopters will be deployed, with the flexibility to increase capacity based on demand. In Mathura, three types of services will be offered: an aerial pilgrimage covering Govardhan Mountain and Lord Krishna's birthplace, a comprehensive aerial tour of Mathura, and connectivity to Noida, and other locations as needed.

Similarly, in Agra, the air safari will cover tourist spots, and direct connectivity will be established, providing ultra-luxurious options for tourists. Hot air balloon services may also be introduced in the near future at many prime tourist destinations.

The establishment of heliports around important tourist hubs will also serve as versatile assets that can be utilized for medical emergencies and surveillance purposes.

In the second phase, the government is planning similar helicopter services under the Public-Private Partnership (PPP) model for major tourist destinations, including Lucknow, Dudhwa, Kapilvastu, Prayagraj, Ayodhya, Varanasi, and Naimisharanya. As the skies open up, Uttar Pradesh invites the world to witness its culture and heritage from a vantage point like never before.
