

and enhancing our capacities are Drone Based Exploration, Fleet Management System, Automatic Sample Collection System, Rapid Wagon Loading System, and automated capturing of production and despatch information in real time.

Towards bolstering transportation efficiency and supply chain resilience, NMDC is building intermediary stockyards, doubling the Kirandul-Kothavalasa railway line, developing a 15 MTPA slurry pipeline and setting-up a beneficiation plant at Bacheli. We are also exploring logistics infrastructure at key business hubs and building sufficient capacities to be able to dial up and dial down ore supply to different routes.

These initiatives are set to play a game changing role in NMDC achieving the 100 million tonne production capacity by 2030.

NMDC has been actively involved in Corporate Social Responsibility (CSR). How do you see CSR contributing to the overall success and reputation of the company?

NMDC has been mining in some of the remotest regions of the country since 1958 and has strived to enhance the quality of life for the people living around our mines, away from the mainstream of development. Since the early 1960's, NMDC has brought hospitals, schools, and employment opportunities to these deep hamlets, winning the company its social license. Our social commitment towards championing women's empowerment, conserving the environment, combating maternal mortality and malnutrition, and creating sustainable livelihood opportunities are celebrated by the community.

The support of local communities play an indispensable role in the growth of NMDC and the company pays its due credit by building a robust healthcare infrastructure, ensuring quality education for all, investing in skill development, and promoting Sports and Heritage. These endeavors have changed the dynamics of Bastar in Chhattisgarh and Donimalai in Karnataka where our major mining projects are located.

We take great pride in supporting the journeys of tribal and underserved youth of the country. Thousands of students from NMDC's Industrial Training Institutes are employed at coveted multinational companies. Our flagship CSR initiative Balika Shiksha Yojana has sponsored the nursing education of over 500 tribal girls in the last decade and strengthened the healthcare workforce in the State. These transformative initiatives are fostering a sustainable and equitable society and have won NMDC national and international honours from S&P PLATTS, SKOCH, Governance Now, ET Ascent, and PRCI among others.

Can you share specific examples of successful CSR initiatives undertaken by NMDC that have positively impacted local communities?

Our intent is to develop a vibrant environment

One of our greatest accomplishments is the robust health care infrastructure at NMDC Projects, which extends quality medical care to the local communities free of cost.
