

In pursuit of operational efficiency, NMDC conducts consumption monitoring and implements innovative measures, such as the trial tests for diesel consumption using the additive THERMOL-D at BIOM Kirandul Complex. Water conservation is another key focus, with regular water audits conducted at all our Projects.

Ethical practices form the foundation of NMDC's operations. We adhere to strict ethical standards in our engagement with stakeholders, from employees to local communities. We proactively conduct Preventive Vigilance Trainings in compliance with CVC guidelines to sensitize our employees on principles of integrity, transparency, and incorruptibility.

NMDC's approach to sustainability, environmental stewardship, and unwavering adherence to ethical practices positions us as a leader in the mining industry, contributing meaningfully to a sustainable and resilient future.

In your opinion, what are the key leadership qualities that contribute to the success of a large-scale mining corporation like NMDC?

Leadership that extends beyond conventional practices, making groundbreaking strides in technology adoption and innovation is the need of the age for a large scale mining corporation like NMDC. As the first CPSE to adopt SAP S4 HANA in the country, NMDC displayed a commitment to cutting-edge technology, enhancing operational efficiency and management effectiveness. Today it serves our entire value chain giving us complete visibility from Pit to Port. A key advancement in the digital journey of NMDC, it is improving our overall business process and is poised to act as a lighthouse project for the Indian Mining Industry.

> Our investment in automatic (robotic) sampling and analysis systems positions NMDC as a pioneer in mining processes, emphasizing accuracy and efficiency. Embracing technologies such as IoT, AI, and Data Analytics further solidifies NMDC's position as a technology leader, fostering adaptability and forward-thinking in its operations.

Beyond technological advancements, NMDC places a strong emphasis on talent management and societal responsibility. The autonomy and responsibility assigned to employees reflects our resolve to recognize and nurture internal talent. NMDC's CSR initiatives, with a focus on education, skill development, healthcare, and community infrastructure, demonstrate a holistic approach to societal responsibility. In essence, NMDC's success is a harmonious blend of effective project management, strategic decision-making, technological innovation, talent recognition, and a commitment to societal well-being, positioning us as a leader in the dynamic mining industry.

How does NMDC align its business objectives with societal and environmental concerns, and what strategies are in place to balance economic growth with social and environmental responsibility?

Towards the goal of becoming a carbon-neutral organization and a role model for responsible mining practices in India and beyond, environment conservation and social welfare are embedded in our corporate policy.

NMDC conducts annual Carbon Footprint studies for disclosure of Greenhouse Gas Emissions under the Carbon Disclosure Project. With proactive response, we have reduced our total per tonne GHG emission intensity by 24% in the last decade. The recommendations of the Water Audit at NMDC Projects are also diligently implemented and we have reduced our water consumption intensity by ~18% in 2023 from the 2018 level.

We take great pride in being a leading proponent of the Government of India's Green Energy Initiative. NMDC has successfully established Solar Power Projects, both in rooftop and overland configurations, and Wind Energy Projects at various strategic locations. NMDC's operations in Bailadila and Donimalai own downhill conveyors, demonstrating our integrated approach to energy consumption.

Safety and well-being are paramount for NMDC, and these principles extend to our strategies for balancing economic growth with societal and environmental responsibility. We prioritize employee safety through proper training and compliance with the Occupational Health and Safety Policy aligned with OHSAS 18001.

NMDC's strategies encompass a holistic approach to business, integrating economic growth with environmental stewardship and societal well-being. Our initiatives in Environment, Social, and Governance (ESG) underscore our commitment to making a meaningful contribution to the broader community and the environment.
