EMBRACING CHANGE AND TRADITION

31 Years of Excellence Aligned with NEP 2020 and Global Goals

In a world where education often straddles the fine line between tradition and innovation, India's New Education Policy (NEP) 2020 emerges as a beacon of integrative thought, seamlessly weaving the rich tapestry of Indian ethos with the dynamic needs of the 21st-century global landscape.

FORE School of Management,
New Delhi

The unveiling of the New Education Policy (NEP) 2020 marked a seminal moment in the history of Indian education, promising a transformative journey from the grassroots to the higher echelons of learning. This ambitious policy is not merely a blueprint for change; it is a bold statement of intent, reflecting India's commitment to revitalize its educational framework while staying true to its cultural roots.

At the heart of the NEP lies a deep respect for the Indian ethos, a blend of ancient wisdom and values that have stood the test of time. This ethos advocates for an education system deeply rooted in Indian culture, philosophy, and knowledge systems, yet nimble enough to adapt to the rapidly changing global scenario. The emphasis on critical thinking, creativity and scientific temper harmonises the educational framework and environment with the demands for operating and succeeding in a globalized world. It recognizes the need for students to be global citizens, aware of international issues and competent to engage with them, while also being deeply anchored in their own culture and values.

NEP 2020 seeks to bring back multidisciplinary in our consciousness not only in terms of approaches, perspectives and cognitive understanding of phenomena but also in the solutions of problems and puzzles that beset the world. In the annals of education, NEP 2020 is epochal as it restores the holistic nature of education and learning.

Central to the NEP 2020 is the emphasis on entrepreneurship and innovation. The policy is cognizant of the fact that the progress of human civilization and solution of societal problems has been motored on the grace of science, technology and innovation. It therefore aims to develop an entrepreneurial mindset among students, equipping them with the skills to innovate, adapt, and lead in a dynamic business environment.

In today's digital age, understanding data science and knowledge and utilization of tools of digital transformation are a must have competencies for global managers. NEP 2020 integrates these elements, preparing students to navigate and succeed in a digitally transformed world. This knowledge is vital for creating an India of tomorrow.

Finally, the New Education Policy (NEP) 2020 aligns closely with several of the United Nations' Sustainable Development Goals, particularly those related to quality education (SDG 4), gender equality (SDG 5), and reduced inequalities (SDG 10). By embedding the ethos of these goals into the educational framework, the NEP ensures that India's future generations are not just academically proficient but also socially responsible and environmentally conscious.

In sum, NEP 2020 manifests the vision of a truly holistic and inclusive future. The NEP 2020 is a visionary stride towards an educational paradigm that is inclusive, progressive, and globally relevant. By interweaving the threads of the Indian ethos with global educational trends, the NEP paves the way for an educational future where learning transcends academic boundaries and becomes a tool for social and environmental change.

> FORE School of Management is celebrating 31 years of excellence, this milestone is not just a testament to our enduring legacy but a beacon for our future endeavours, aligning seamlessly with NEP 2020's vision. It embodies the commitment of FORE to fostering an educational environment that is innovative, inclusive, and deeply rooted in our rich cultural heritage.
