

"Most of us are going to find ourselves at some point in our life making big decisions that shape everything. Having a child is one, getting married is one, maybe buying something very expensive is one.... We spent the last three years finding all kinds of key things that are important to make such decisions"

"**NEURAL IMPLANTS CAN BE USED TO GIVE US THE POWER OF A '250 IQ POINTS HUMAN', WHO MAYBE WILL SOLVE THE FLAWS IN CANCER RESEARCH OVER THE LAST 100 YEARS.** IN A MOMENT, WE'LL JUST SEE THE ANSWER. MAYBE WE'RE GOING TO BE ABLE TO COVER ALL KINDS OF QUESTIONS IN PHYSICS AND MATH THAT WE'VE BEEN STRUGGLING WITH FOR YEARS"

"There's a saying written on my lab door that says the difference between science fiction and science is timing. In that sense, these are no longer *Star Trek* and *Star Wars* movie ideas. They're already being developed in labs. This means that it is time to think about them before they are out in the market"
