TOP 3 GAINERS

Colleges that have made the biggest leap since last year

COLLEGE	CITY	RANK IN 2024	RANK IN 2023
SCHOOL OF BUILDING AND ENVIRONMENT, SATHYABAMA INSTITUTE OF SCIENCE AND TECHNOLOGY	Chennai	15	18
FACULTY OF ARCHITECTURE AND PLANNING, DR. A.P.J. ABDUL KALAM TECHNICAL UNIVERSITY	Lucknow	17	20
SCHOOL OF PLANNING AND ARCHITECTURE (SPA), BHOPAL	Bhopal	4	6

NEW ENTRANTS AMONG TOP 25

Colleges that feature among the top 25 for the first time

RANK	COLLEGE	CITY
20	SCHOOL OF ARCHITECTURE, ANANT NATIONAL UNIVERSITY	Ahmedabad

opportunities for getting **grants and scholarships for research projects** and participation in major national and international conferences

Ranked first in the number of **international research papers** published per faculty member in the past two years

DID YOU KNOW?

The Department of Architecture and Planning, IIT Roorkee, is one of the centres granted funding and recognition under the Atal Mission for Rejuvenation and Urban Transformation (AMRUT) for urban planning and capacity-building

FIVE EMERGING TRENDS IN ARCHITECTURE EDUCATION

Sustainable built environment: The department puts emphasis on sustainability and resilience in architectural design to address environmental challenges. They also encourage designing buildings that are suited to the local climatic conditions for enhanced comfort and reduced energy consumption. Students are trained to design structures that can withstand natural disasters like earthquakes, floods and storms

Digital and computational design: This is an integration of advanced digital tools and computational methods in the design process such as parametric design using algorithms and computational techniques to create complex and optimised architectural forms. Training in BIM software for efficient project planning, design and construction management as well as utilising VR and AR for immersive design visualisation and client presentations, is also provided

Interdisciplinary collaboration: The course promotes interdisciplinary approaches to solve complex architectural problems through collaborations with international universities and research institutions that helps provide a broader perspective and exchange of ideas. Design thinking workshops bring together students from various disciplines to brainstorm and develop innovative solutions

Smart and responsive environments: The focus here is on designing smart buildings and environments that leverage technology for improved living experiences by integrating IoT, sensors and automation for enhanced building performance and user comfort. Using data analytics and smart city technologies to plan and manage urban environments more effectively is another plus

Heritage conservation and adaptive reuse: Students are trained in the preservation and adaptive reuse of historical buildings with extensive and detailed courses on methods and materials used in restoring historical structures. On-site learning experiences at heritage sites helps them understand the practical aspects of conservation.
