The Department of Computer Science at Christ remains at the forefront of the rapidly evolving tech landscape by fostering strong connections with the industry. Dr Ashok Immanuel V., head of department, stresses the importance of immersing first-semester BCA students in programming from the outset, given the application-oriented nature of the course. "By the second semester," he adds, "students delve into web development, thus securing internships within their first year itself." The second year introduces mobile computing, which means that students get exposure to execute projects quite early on. The department has strategically revised its curriculum to emphasise practical applications, with faculty members guiding the undergraduate students on the potential for publishing projects as research papers. Looking ahead, the department plans to advance project work by a semester and rope in alumni for consultations to fine-tune the ideas before implementation. This will ensure the students gain both practical exposure and research opportunities. ■

WHAT SETS IT APART

- Christ has an **NAAC grade of A+**, with a CGPA of 3.4/4
- As many as **96.5 per cent of the students** who opted for placements received a job offer last year
- The **average annual salary (domestic) offered to its students is Rs 5.95 lakh,** the second highest among all BCA colleges
- Its faculty has **the most books published per member** in the past two years among all BCA colleges

DID YOU KNOW?

- Last year, a group of fourth semester students **developed an in-house app** to automate the process of aggregating documents for quality assessments by the NAAC and the National Board of Accreditation
