The tastiest multi-vitamin capsule in the world.

Eggs.

Perhaps the only food on the planet to get a 100 point rating from the World Health Organisation.

An egg is the most exciting way to get your daily dose of essential vitamins.

It's rich in Vitamin A to build your resistance. The Vitamin B Group for good digestion. And Vitamin D for strong bones.

Eggs are packed with the highest quality protein. To repair your worn-out tissues. And boost your children's growth.

They're rich in iron and phosphorous, essential for healthy blood and an active mind.

Pop in an egg every morning. It's the one vitamin capsule you'll love.

Have you had an egg today?
