INCUBATOR OF POSSIBILITIES

A distinguished faculty that discharges a holistic pedagogical approach, cutting-edge infrastructure and innovative research make Hindu College the torchbearer of science education in India

BY SHELLY ANAND

Sculpting the future. For 125 years, Hindu College has stayed true to that slogan, its reputation as a top-tier undergraduate college evident in academics, research, extracurricular activities and placements. That commitment to rigour and excellence is true of its Science stream as well, drawing a significant influx of applicants every year. Not only does the college have an esteemed history, set up as it was when the Indian National Movement began taking shape, but also a superior faculty, modern infrastructure and diverse interdisciplinary research. At Hindu, the focus is not just on knowledge dissemination but also on nurturing critical thinking, a questioning spirit and problem-solving skills. Students here gain a competitive edge via hands-on learning, workshops and seminars, helping them deal with tomorrow's challenges better. ■
