NEW ENTRANTS

Colleges that feature among the top 25 for the first time

RANK	COLLEGE	CITY
28	ALL INDIA INSTITUTE OF MEDICAL SCIENCES	Raipur

- Check student intake capacity, **hostel and other fees**, final year graduating record
- Check certifications and **MCI recognition, university affiliations**, international recognitions
- Check **infrastructure, accessibility** and hostel framework

FIVE NEW AREAS IN MEDICAL EDUCATION

By Dr Anupam Sibal,
Group Medical Director, Apollo Hospitals

- **Genomics:** In the future, treatments will start depending on genomic markets. We have over 250 drugs linked to genetic mutations; we also need genetic information for over 20 cancers. A sub-branch of genomics will be for prevention in those at a risk of passing on genetic disorders
- **Robotic surgery:** This is the future of surgery as it causes minimal damage to healthy tissue, less pain for patient
- **Rheumatology:** Cases are rising but we have few specialists in India, training less than 40 a year. There is a growing need for specialists; new courses are coming up in response
- **Specialised oncology:** Today, surgical oncology is split into niche specialisations as treating cancer is different from treating other conditions surgically. Specialisations include GI surgical oncology, gynaecological surgical oncology, head and neck surgical oncology

Family medicine: Like in the US and Australia, India has to start training family medicine specialists to look after the basic medical needs of a family and direct them to further consultation, saving time and money

FIVE TIPS TO CRACK NEET

By Dr Madhavi Mathkar *Junior resident, PG first year, MD General Medicine, DY Patil Hospital, Navi Mumbai*

- Focus on the **previous year's questions** and their topics
- Solve as many questions as possible; give **multiple mock tests**
- Increase **revision frequency** as exams approach closer
- Devote time to **revisiting mistakes**. Without this, solving more questions will be useless
- **Learn primary source material** well; later build on it depending on your understanding of the topic.
